Board of Directors Meeting - Wednesday, December 14th, 1966

The regular quarterly meeting of the Board of Directors of the Association was held at the International Hotel, John F. Kennedy International Airport on Wednesday, December 14th, 1966.

President Frank Mirenda opened the meeting during luncheon with the following Directors present:

Messrs E. Bloom, V. Booth, E. Chamberlin, S. Davis, R. Dillon, W. Dobler, P. Dursi, R. Feiden, O. Ferraro, N. Fleishman, C. Gallagher, J. Leopold, F. Mirenda, G. Memoly, B. Palley, I. Rogers, E. Soukup, N. Spare, H. Spielman, H. Stern. Also present were Past Presidents H. Flinn, J. Hayes, W. Heingartner, E. Malice, N. Mintz and Counsel H. Ordman and Peter A. Gordon.

A motion was made, seconded and unanimously carried that the reading of the minutes be dispensed with as copies had been mailed to all concerned.

Mr. Mirenda, President, reported as follows:

We have a few matters that have troubled dealer members which I wish to report on today.

1. Dealers in all counties have been receiving summonses for using dealer plates evenings and on Sundays. In some cases, rather than fight the situation, the dealers have pleaded guilty and paid fines.

   In other cases, where the plea was not guilty and evidence was shown that the law had been changed, the judge has ruled otherwise and levied fines.

   We have taken one particular case and spent $50.00 to have the minutes of the case transcribed and this case is now on appeal.

   It is important that we get a satisfactory ruling on this as it would be necessary to get additional legislation passed.

2. The Department of Markets of the City of New York issued a regulation last year that all used cars must be priced and plainly marked.

   We protested at the time stating that all dealers kept files and if a customer asked, the card indicating the price, would be shown to the customer.

   At that time the Commissioner indicated that he felt we were complying with the regulation.

   However, since that time, many summonses have been issued and fines of $5.00 to $15.00 levied.

Our attorney has contacted the legal department of the City, the corporation counsel, who agrees with us and has advised the Markets Department that he will not prosecute.

We are continuing in this matter and hope it will be resolved satisfactorily in the near future.

3. The matter of Nabcor, Inc. has been referred to N. A. D. A. for action with the factories.

This subject was brought up at the Chrysler Dealer Council meeting and Chrysler stated they had no leasing agreement with Nabcor.

We have secured additional information on the principals and other chartered corporations and this information has been passed on to N. A. D. A.

4. With regards to the request for the factories to include the dealers in their product liability insurance policies. We have only received one reply. This from American Motors in which they answer they cannot handle this.

At the conclusion of Mr. Mirenda's remarks, Mr. Malice brought to the attention of the Board the activities of the United Buying Service and the United Auto Brokers and indicated that he considered this a serious problem.

A motion was made, seconded and unanimously carried that the President's report be accepted.

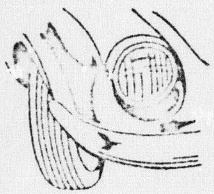
INTRODUCTION

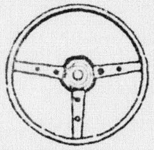
Welcome to the Nabcor System. This is an introduction to your training program, and we will discuss some of the problems, solutions to these problems, methods of operation, and the rewards to be gained. First, let us discuss briefly the Nabcor System. The Nabcor System is concept-devised to enable you to effect new car purchases for your customers and make a profit by doing so. Prior to the Nabcor System, large showrooms, parts inventories, high overhead, and so forth were necessary.

The automobile business is slightly different from most other businesses. You cannot operate an automobile business in the same manner that most laymen expect a business to be run. There are certain peculiarities within the system itself that cannot be avoided. Automobiles are highly complex machines, which require approximately 12,000 parts. Each one of these parts is a highly engineered piece of metal that enables an automobile to give you all the comforts and safety of the home away from home. You can travel at speeds up to 100 miles an hour without wind noises, or rattles. It will transport you quickly and safely to business, shopping, and daily chores. It's a near-perfect piece of machinery. Like any complex piece of machinery, there are some flaws. The manufacturer, in producing an automobile with 12,000 parts in as short a time as it takes to assemble an automobile, (anywhere from four to six weeks) has accomplished what is a near-miracle. A house, certainly, is not nearly as complex as an automobile, and could take six months to build. In the vast system that produces nine million automobiles a year, there will be some imperfections. Nabcor cannot be any more perfect than the industry itself. There will be problems that you will encounter. In our training program we want to acquaint you with some of these problems. In the beginning, these may seem enormous to you, but as you adjust to the system these problems will be anticipated, and most of them will be eliminated by preparing the customer for these small irritations.



For example, you may order an automobile, and normal delivery may take from four to six weeks (you promised your customer this) but for some unknown reason, something in this vast, intricate, and almost perfect system broke down. Something in the computer system that has ordered all of the parts to be shipped to an assembly point from all over the country broke down with regard to this particular vehicle, or some other problem in this highly complex system caused this automobile to be rejected from the system. It has to go through the entire process again. This may cause a two, three, or even four week delay. These are unusual situations; nevertheless, they can happen.

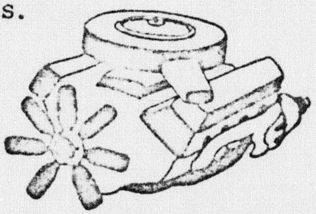
Now you have a highly irate customer who expected his car in four to six weeks. This automobile has taken two months or two and one-half months to deliver. Your normal deliveries may be only four weeks, but this one took longer. Consequently, you have a customer who is calling every day, making complaints, because you've promised him the automobile in four to six weeks, and he expects delivery. You prepare for this particular situation in this manner: When you take an order for the customer for an automobile, explain that normal delivery is six weeks. You feel 99.9% sure that his car will come through in that time, but a problem may arise that may delay the car for a week or so. In so doing, you have prepared your customer, and if such a situation does occur you can always explain the delay by saying, "Well, unfortunately, your particular case is one in a thousand, but there is a delay. We put a tracer on the automobile. We will try to find what has happened to this particular vehicle. We'll handle it as quickly as possible for you but, unfortunately, there can be a delay. As I told you when we wrote this order, this does happen sometimes." In most cases, the customer will be satisfied to wait until the car comes in.



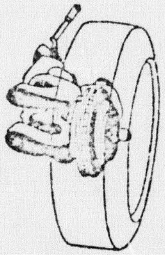
Sometimes an automobile that has been ordered may come through wrong. Actually, this is not your responsibility, nor is it Nabcor's responsibility, nor is it our suppliers' responsibility. Again, something has gone wrong with the system. The computers may have erred in this particular situation, and a black automobile that was ordered with a blue interior may come through with a tan interior. It is unfortunate, but this will cause a delay. The car must be re-ordered. There are situations where dealer preparation or pre-delivery is not perfect — there are many things to be done. The car must be tuned, cleaned, hubcaps put on, and floor and trunk mats installed. There is a protective coating on the automobile when it comes in from the factory, and this must be removed. Every instrument in the automobile, such as gas gauges, blinkers, ammeter, radio, lights, etc., must be checked out. The transmission must be adjusted properly. Many things must be done to make an automobile ready for delivery. Human beings are not perfect. The best mechanic may not have done this particular preparation or, quite possibly, a good mechanic did the preparation properly, but a sloppy porter did the clean-up improperly.

There may be little things, such as a grease spot here or there, that upon close examination may prompt you not to want to deliver the automobile in this condition to your customer. You should go over the car yourself, and correct these slight imperfections.

Problems of this nature will arise, and naturally, if you want to keep your customer happy, you will see that these things are done. He's buying a new automobile, and he thinks that it should shine like a newly-minted coin. It is difficult to get help that will clean every crack and crevice in the car, or to find porters that will take time and pay the necessary attention to detail. A re-examination before delivery sometimes is in order, and this can't be avoided. Cars cannot come through letter perfect in each and every case. We check the automobile in every way before we accept it and deliver the car to you. Unfortunately, there are things that we cannot detect in a quick inspection; we expect you to correct these minor imperfections.



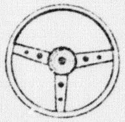
There are other situations that may arise. Automobiles are machines, and are subject to mechanical failure. Even the finest engineered car can fail. It is a production item. There will be times when your customer may take delivery of a car. Everything else is in order, but for some unknown reason he runs into a slight problem of a mechanical nature. If the car should stop, and then not start at all, any dealer will take this as being an emergency, and correct it immediately. But in most cases it will be some little thing that does not affect the operation of the car. This will be put off until after the car has been driven a thousand miles or so. At the time of delivery, you should explain to your customer that there are some things that will be repaired after the car has been driven a thousand miles or so, or when he changes the oil. Certain annoying problems of a mechanical nature that are under warranty will most likely be repaired at that time.



There may be some annoying problems that are not considered warranty problems. These are situations that could have, or should have been taken care of in preparation of the automobile. No one could have foreseen them or could have detected them. Handle this type of situation exactly as it is handled by the new car dealer. Set aside five dollars per car. When you run into one of these problems, and you want to satisfy your customer, send the car to the nearest service center. If you have a service center, take care of the problem yourself. It may be a rattle — have your mechanic take care of it. It may cost you three or four dollars for his time, but you've a satisfied customer and this is just another cost of doing business. If you send this man into the factory dealership, the dealer will not take care of the problem because he will not be reimbursed by the factory. This is not considered "warranty work." The manufacturer does not warrant squeaks, rattles, or water leaks unless, of course, they are excessive water leaks.

There are certain things that your customer is obligated to do in the operation of his vehicle. Maintenance is his responsibility. He must pay for oil changes and for the oil filter every 2,000 or 4,000 miles; this is normal in the industry. Whatever the manufacturer requires for maintenance is the customer's obligation, and he must pay for this service. Wheel balancing, alignments, tune-ups and adjustments of this type are considered maintenance, and this should be explained to your customer at the time of delivery. Maintenance is his obligation and he must have it done, and he must pay for it. Explaining this to him eliminates a few of the problems.

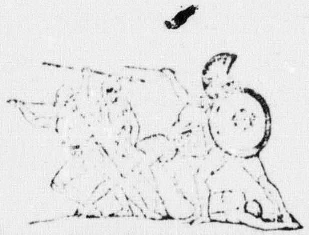
There are also paint and glass. Glass is not under warranty. If the automobile that you delivered to your customer has no evidence of cracked or chipped glass, and your customer accepts delivery, he then assumes responsibility. He cannot come back to you later and say, "There is a chip in my windshield," and expect you to do something about it. (These are extremely rare cases that we are pointing out, but we do want to prepare you properly.) At that time your position should be, and rightfully so, that this is something that was not there at time of delivery and you are not responsible. It may have been caused by another vehicle kicking a stone. In any case, this happened after he took delivery of the vehicle, and his insurance should take care of it.



As far as paint is concerned, major imperfections in the paint (for example, chipping throughout, or paint fading) are the responsibility of the manufacturer. But little chips around door edges, hood edges, or trunk edges are a normal thing in a new automobile. Some cars come through without them and some with them. One of the best things to do when you deliver the car to your customer is to buy a can of touch-up paint (this costs about 69 cents) and you can touch up these things yourself. You also can give your customer the can of touch-up paint, and explain to him that if he took this into a dealership for touch-up, very possibly a sloppy worker would be assigned to his car and do a worse job than he could do himself. So give him a can of touch-up paint. This is an investment that would save you time and problems. Explain to him that this is his property; this is his automobile, and he certainly is better off taking care of a little thing like that himself than to have some manual laborer or porter do it. What might be a chip a sixteenth-inch in diameter might well become a blob an inch in diameter when he gets it back. He has to be told that you are offering him this can of touch-up paint as a part of your service to him. We are pointing this out to you to make life easier for you. If your customer understands these things, he's a happier customer, and you avoid situations that cause you to lose a customer.

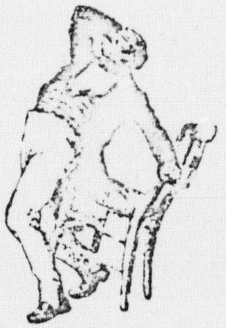
E-549

Another point to remember is that the dealers and their salesmen will not appreciate you. You are competition to them. They have invested a half a million dollars and more for the privilege of selling one make of car, and naturally they resent the fact that for a very small initial investment, and no overhead, you are dealing in all makes. Therefore, your customer may be exposed to situations where a salesman may say, "We won't service your car," or some service manager may say, "We won't service your automobile — you'll have to take it where you bought it." Things of this nature will come up. Car dealers, their salesmen, or other people associated with the automobile business as it has been, may tell a customer half-truths and untruths in order to kill your sale. You must anticipate this. You must realize that they resent your being in the automobile business. After all, you are competition to them. Nobody likes a competitor, and you must learn to disregard things that some of the customers may come back and tell you. Not disregarding them could put you in an uncomfortable position. Therefore, you must learn to answer questions properly rather than to become upset.



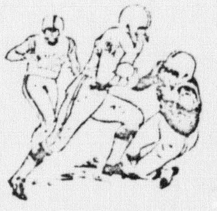
Remember that factory dealers also have these problems. Statements that may be used to undermine your position are also used by factory dealers to undermine other competitors. This is part of the automobile business, and you must learn to disregard it. DO NOT ALLOW IT TO DEMORALIZE YOU, WHICH IS EXACTLY WHAT IT IS INTENDED TO DO!

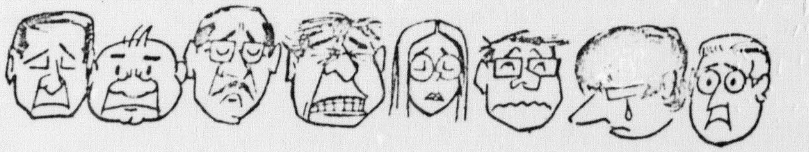
The next step in our preparation to make you a successful automobile broker is to explain some of the psychological factors associated with selling a high-priced item. Some people have never sold anything that cost over a hundred dollars, and might have a tendency to freeze up when they are about to take an order for something that costs as much as $5,000. There are psychological factors involved in adjusting from a $100 sale to a $5,000 sale. The extremely conservative person would have a tendency to hesitate on a purchase that would be more than $100, or on a sale that could be as high as the cost of a new automobile. It takes a certain amount of experience for a broker to realize that some people will buy an automobile in ten minutes. We have to accept the fact that a large percentage of people are impulse buyers.



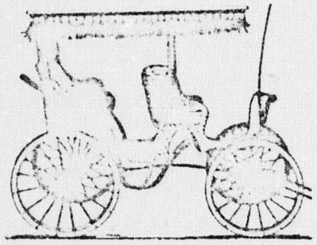
If you freeze up at the time that it is necessary to ask for the order, and you don't ask for the order, and allow your customer to think about it until the next day, he may walk into a dealer's showroom and that salesman will ask for an order. You will have lost a sale. You probably will lose some sales as a result of your inexperience during your adjustment period, but remember that since you are selling all makes and all models, and that every adult, male or female is a prospect, you can afford to lose some sales. A little additional effort on your part will overcome these losses. The potential is there, and the people are there, the buyers are there. You may lose some sales (no one can sell everybody), but you can make this up and earn more than enough to profit in that initial adjustment and on-the-job training period to overcome this situation. Some brokers might have the tendency to become demoralized because they have lost a sale — their ego doesn't allow them to realize that it was the result of inexperience, of psychological factors, or of lack of adjustment to the system, or that they are not allowing themselves enough time to adapt to the automobile business.

They may have a tendency to blame the concept itself. THE CONCEPT WORKS. There are many brokers who are selling many automobiles each month and making the high profits that the concept offers. Demoralizing yourself can put you in a position to look for excuses and blame the system and the company. Every system can be improved on — certainly the Monday-morning quarterback can improve any system — but try to remember that the successful businessman improves and strengthens his own system and business. The successful salesman always tries to determine what he did wrong. He tries to correct his mistakes, and goes on to the next sale. He does not try to find or manufacture excuses. His attitude is that if someone else is doing it, he can too, and he tries to do it better. He finds the way to succeed. Some people never succeed because they can always find logical and rational reasons why that particular thing did not work. They can go on and on, weaving elaborate arguments as to why it is not their fault but someone else's.





The good businessman reviews the entire situation and says to himself, "I must have done something wrong — what was it?" He analyzes what he said — at what point did he lose control of his customer — at what point did he miss this sale? He does not waste time inventing excuses when the simple fact is that someone else used better salesmanship and made the sale. Don't be the type of person who invents arguments, and uses them as excuses to hide his own shortcomings. THE SALES ARE OUT THERE — GET THEM! If you use our program, and follow it diligently, you can't help but succeed. Prepare your customers for some of the things that can be irritating. If you do, it will not make them susceptible to statements that they may be exposed to from other salesmen. It makes life easier for everyone, including you. We have discussed how dealers and their salesmen may be hostile to you, but we have had many cases where enterprising Nabcor Brokers have made it their business to call the dealers or the owners themselves, and have made an effort to get along with those dealers. They have introduced themselves, and explained that they are not trying to disrupt the market or hurt anyone. It's always better to get along, and to be on a friendly basis; in that way, there are no animosities.



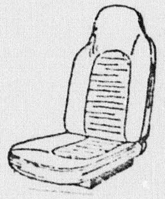
Unfortunately, sometimes a dealer will be hostile. We have had situations where dealers (in order to try to disrupt our system) have offered cars to brokers at the same price as Nabcor. They have tried to create the impression that the broker doesn't need a national system. Should the broker go along with a deal like that (and we have had one or two instances where the brokers have gone ahead and tried to buy the automobiles on their own) he will find to his bitter disappointment that in a month or so the dealers will very quietly raise prices to a point where the broker cannot operate. Don't fall for that — our system eliminates that possibility — it keeps you in business.

We feel it necessary at this point to explain that the automobile will be delivered to the office nearest you, or to our nearest source of supply, by drop shipment. Any transportation costs to your place of business will be added to the cost of the car.

We have covered quite a few problems, because we feel that we should cover these things in order to prepare you properly. The reason we have discussed some of these problems is that some brokers may have a tendency to take

these problems and blow them up completely out of proportion to their relative importance. This could be harmful to the broker, and harmful to Nabcor.

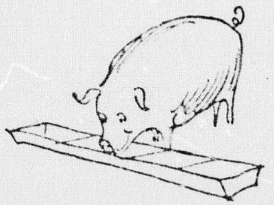
As you adjust to this business, you will learn to live with these little things. They cease being irritations. You learn to adjust to them, to anticipate, and to prepare for them before they occur, so that when they do come up, they are already planned for, already anticipated. Then they are not problems. Once you do adjust, many of the things that we have discussed here will not exist any more. Then you can enjoy the rewards of a dignified and profitable business.



Now, let's go into the more pleasant aspects of this business — the advantages and rewards of being an automobile broker. It doesn't require manual labor on your part. You are highly respected by every one when you are in a business such as the automobile business. You gain prestige by being part of it. It is a business that offers potential profits that no other business offers you. In every other business you have to do as many things to make a profit as you have to do to make an automobile profit, but the profits are very low in comparison. When you make a sale in any other business, you may make only pennies — when you handle an automobile purchase, you make many dollars. So, after all of the shortcomings we have brought out about the business, try to remember that no business is as easy as the automobile business. Realize the fact that every adult, male or female, is a potential automobile buyer. The sales are there — you

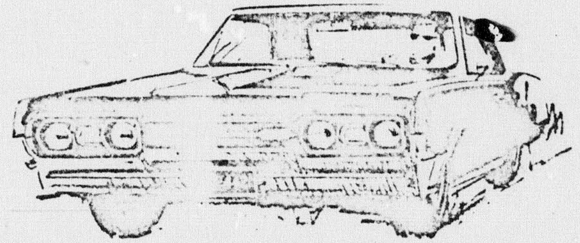
F-552

don't have to look for them. This is a pre-sold product, and as a broker you don't sell the automobile — you sell yourself.



There is no other business that offers this. You have no competition since you handle all makes and all models. The only competition that has ever existed in the automobile business has been dealers competing against each other. Ford dealer against Chevrolet dealer — Ford dealer against Ford dealer, etc. In the Nabcor System with the handling of all makes and models, as a broker, you have no competition. Even the hot dog has competition — not everybody likes hot dogs. Remember, everybody likes automobiles. This is one of the finer aspects of this business — the rewards and the pride of being in a large business, plus the fact that you'll build a repeat business. You can handle all makes and models, and your customer can buy from you again and again. If he is treated properly, and if you have sold yourself properly you can sell your service to him and his family and his friends for as long as he buys automobiles. As you advance into the second phase, you also have used cars and a second potential profit. You also have many other profit potential from finance reserves, insurance reserves, etc., in the automobile business. You also are building a customer following that will be yours, not Nabcor's. You don't have the same problem that the Ford or Chevrolet dealer has — he builds good will for Ford or Chevrolet. The good will that you build is yours. The customers that will deal only with you are your customers — your assets — and these assets are marketable ones. As you build a customer following in your area, your franchise and your business become more valuable. That equity is yours.

These are some of the rewards. We will now close this introduction, and go right into our first lesson so that we can prepare you to reap those rewards to the fullest extent.



LESSON 1

Lesson 1 deals primarily with the various forms necessary to your business. The first and most important form we will discuss is the "Purchase Agreement," which is Form BAPA 1001. If you will pick up this form (see Fig. 1) we will go over it so that you will have a clear understanding of how to fill it out properly, why it is necessary to do so, and how this form can help you.

You will notice at the top center it says "Purchase Agreement," and that is exactly what it is — an agreement of purchase. It is an agreement by your customer authorizing you to purchase a car for him. Underneath this is the date. You fill out the date, and go on to the next step. "I, John Doe, his address, hereby agree to purchase the following described vehicle and request the equipment and services set out below." Use any new car you desire for this example, and fill out the year, make, cylinder, model, type, and color.

To the right of "Basic Price" you fill in the "Suggested Retail Price" as shown in your price book. This is the manufacturer's suggested retail price. This price includes freight to Philadelphia, and must be adjusted to conform to freight charges to your area. Under "Equipment," you list the extra equipment, such as power steering, power brakes, etc. List the equipment and amount as shown in your price book under suggested retail. On line (1) total the basic price and equipment. This price will include your broker's fee.

For this example, we will assume your total price is $4,000. The next line, (2), is allowance — it says "Deduct

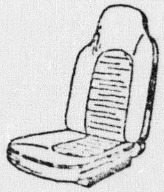
Allowance." At this point go to your price book, and take the total cost of the car selected. You will notice in your price book that there is a column headed "Total Cost." This is the total cost to you of the car you have selected. To this figure you will add freight charges to your area and your brokerage fee. Let us assume for this example that these figures total $3,200. You then subtract $3,200 from your total price in line (1), which would leave $800. You insert the $800 figure on line (2) as your allowance or discount. On line (3) insert the difference after subtracting line (2) from line (1), which is $3,200. Line (4) is "State and Local Taxes," line (5) is "Title and License Fee." This is the charge made by your state for the registration of that particular car in that state for your customer. To the license fee must be added $10 for interstate registration papers which are supplied by Nabcor. This charge must be inserted on line (5) even if your customer is handling the registration of his own car. Line (6) is inserted in this Purchase Agreement for any other charges which may be peculiar to this particular transaction. For example, these could include costs for services requested by your customer but not listed elsewhere on this Purchase Agreement. We will ignore line (7) because no trade-in is involved, and therefore there will be no payoff on this particular transaction. You then add lines (3), (4), and (5) (and (6) if anything is entered on that line) and insert your total in the line beside "Balance Due," which is marked by the letter A . This is the balance due on that particular automobile.

In many states, local sales taxes are charged only on the cash difference after deducting allowance for a used car

being traded in on a new car. It then would be advantageous for your customer to have his trade-in deducted from the total price of the new car (line (1)). When this is necessary you would follow the procedures outlined below, and shown in Fig. 2. For the purpose of this example let us assume that you have established that the customer's car is worth $200 wholesale. You would then add $200 to the $800 cash discount you had allowed to your customer on line (2) of the previous example. Line (2) now totals $1,000. Line (3) is now $3,000.



Go to the left side of the page, where "Year, Make, Cylinders, Model, Type" are listed. Note at the top it reads, "As part of the purchase price, I hereby sell and assign all of my rights, title, and interest of the following described vehicle which is free of any lien or encumbrance, except as stated below." List here the required information. We will use a 1962 Chevrolet Impala as an example for the trade-in:

Year	1962
Make	Chevrolet
Cylinders	8
Model	Impala
Body Type	H.T. (hard top)
Color	Green
Equipment	R&H (radio and heater) A.T. (automatic transmission)

It is not necessary to list all equipment such as power steering, brakes, and other equipment the car might have.

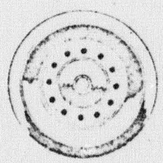
Figure 2. Nabcor Purchase Agreement Form, Example 2.

Incidentally, you can either abbreviate or write these out as you choose.

List the serial number, the license number, and the state. It is good to have that information. There are times when the information in this form will be needed in your records. The "Allowance" for the trade-in is the same as in line (2) of the Purchase Agreement.

Now return to line (3) on the right side of the Purchase Agreement where you've inserted $3,000, which is the Total — line (1) $4,000, less Allowance — line (2) $1,000. You then add State and Local Taxes — line (4). Today most states have a sales tax. Assume the sales tax is 5%. On $3,000 the tax would be $150 — insert $150 on line (4). Insert the Title and License Fee on line (5) if you are going to register this vehicle for him. For this example we'll use an arbitrary figure of $20. Use line (6) for whatever purpose you find necessary, such as a city tax, etc.



Line (7) is the payoff. For the purpose of simplicity we will use $500 for this payoff. This is not a normal situation, because as you have noticed the wholesale value of this car is only $200. So, in this particular case, the customer would owe more on his car than it is worth. We are only using this as an example. There may be an occasional situation where a customer may owe more on his car than it is actually worth, and we would like to bring this out as part of your training. See Fig. 2 as an example of this situation. On the other hand, there may be no payoff. See Fig. 3 as

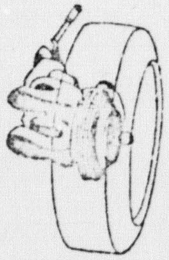
an example of this. Frequently there is no trade-in, as shown in the example in Fig. 1.

The word "payoff" means the amount of money that must be paid to the bank or finance company to clear the title of any encumbrance or lien on the trade-in. Assume that the customer has ten payments of $50 each remaining on his original loan on the trade-in (this is known as lien or encumbrance). You insert $500 on line (7). Incidentally, there may be some rebate on insurance or interest which is returned to him, but you won't know this until you call the bank or finance company for the exact amount. We will use ten payments of $50, or $500 total, as his payoff. You have allowed him $1,000 for his used car. You have deducted the allowance, which leaves $3,000. Next, you have taxes, state title, and license fee, and then the payoff. Since you have allowed him $1,000 for his car, it must be free of any liens or encumbrances, so any lien or encumbrance on this vehicle must be added to that amount due, if you are going to make the payoff.

If the customer chooses to make this payoff himself and brings you a clear title or bill of sale, you would not add the payoff to his balance. We are assuming that you called the finance company, and issued your check for what is owed on his trade-in in order to get a clear title. You would have to add that $500 to the balance due. That is the reason you inserted $500 in line (7), Payoff. You should arrive at a total of $3,670. Go back to the left side of this form. Under "Allowance" in the Used Car section, you will notice "Deduct Payoff." Insert your $500 payoff line (7) here

E-557

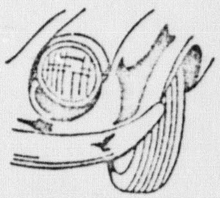
since you have allowed him $1,000 for his trade-in. Deduct the payoff ($500) and you now have a net allowance of $500 (which is the equity on his vehicle). In the section "Payoff Payable To", insert the name of the finance company or bank and the address.



Now that you have completed this portion of the agreement, go to the settlement part of this sheet. You will notice that immediately under the Used Car Section, it reads, "I request a settlement as follows." The "Net Allowance" is $500; insert that amount on this line. Next is "Cash on Delivery." At this point, you must discuss this with your customer, and determine if he will pay cash or if he is financing the vehicle. Let's assume that your customer is going to put down a $500 deposit, and he wants to pay cash for the car on delivery. He would then give you a $500 check, or cash, and you enter that amount in the space "Deposit Non-Refundable." The reason for a non-refundable deposit is that you are going to order this automobile for him specifically, and this must be a binding order.

The next line is marked "Receivable." We would suggest that you disregard this item unless you have unlimited capital and want to risk losing it. We do not recommend "Receivables."

Now go back to the line "Cash on Delivery," and insert here the "Balance Due" beside the letter A less any cash received. In this case it would be $3,170. This is the amount he is going to pay you on delivery. Therefore, the sum "Total Down Payment" will be $4,170. "Total" at letter C will be the same — $4,170. This completes your deal. You then have the purchaser sign in the lower right side where it says, "Signature of Purchaser."

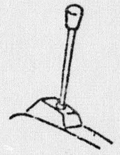


Underneath, where it says "Broker," you sign. The next step is the power of attorney. Notice on the bottom of the page under the dark line where it says "Power of Attorney" "I hereby impower, (you insert your name as the broker) to purchase above new car for me from Nabcor Incorporated in the state of New York, and also impower, (again insert your name as the broker) to sign the necessary Purchase Agreements, and other documents for me." In the next paragraph you see another space where you insert your name as the broker. Then have your customer sign at the bottom of the page where it says "Signature." This gives you the authority to make this new car purchase for him. On the left side of the page immediately above the power of attorney section you will notice "Approved By" and "Accepted By." These will be approved by the person in charge of your area, and accepted by Nabcor. Do not fill in these blanks.

Now go to the upper left-hand section of the page, where you see an oblong blocked-in section headed "Title and Registration," which reads, "You are hereby authorized and directed to title and register this car in the name of______ _____ for whom I am buying it." "Signed, __________." You, as the broker, sign here.

This blocked-in portion is there for your protection if you encounter an individual under 21 years of age. The law states that no contract is binding on an infant or someone who is not of legal age (which is 21). If you sign an agreement with such a person, he could wreck that automobile, bring back the wreckage, and demand full payment. If you were to refuse his demands, he could go to court, and the court would force you to return the full purchase price of this vehicle. Therefore, it is extremely risky and inadvisable to deal with minors. That is the reason for this block. If a minor wants a car, and his father is willing to purchase the vehicle for him, you fill out the Purchase Agreement as though you were selling the car to the father. The father signs at the bottom right-hand corner (Signature of Purchaser) of the Agreement as though he were buying the car (which he is). Where it says, "Signed," the father signs along with the broker. That, in effect, makes this agreement legal. The car can be titled and registered in the son's name with the father's signed permission. But you have sold it to the father, so you cannot possibly be harmed under the Infant Laws. On the bottom right of the page there is a section of fine print which states that this man is of legal age and so on. It spells out the terms of the agreement. I won't elaborate on that. It is self-explanatory.

Now, go to the final part of the Purchase Agreement. In the center blocked-in section, headed BALANCE EACH DEAL, you see "Work Space Only. Total of A & B must equal C." On line A, insert $3,670; on line B, $500. Add A and B for a total of $4,170. A plus B must equal C — so, C is $4,170.



Beneath that, you see "Total of lines 1, 4, 5, and 6 must equal C." Line 1 is $4,000; line 4 is $150 (state taxes); line 5 is $20; line 6 is blank. The total is $4,170, and this total must be equal to **C**. I must stress the importance of balancing your deal. If it does not balance, check your addition and subtraction, because you made a mistake somewhere on the form. It could mean a loss of money for you.

We have covered the Purchase Agreement form, but will refer to it from time to time. Before closing the discussion on this form, I must remind you that it is part of your bookkeeping system. File each of these completed Purchase Agreements in your sales folders (making sure that you have balanced your deal properly). This will ensure that you will save many, many dollars, both in time and in accountant's fees.

The original copy of this form (when ordering a car for your customer) must be sent to the man in charge of your area, along with the non-refundable deposit, to be forwarded to Nabcor for processing. This must be done immediately upon completion of this purchase agreement.

The next form that we will discuss is the Credit Statement, Form NCSF-7007 (Figs. 4a and 4b). If your customer indicates that he wants to finance his automobile, you would complete this form. You fill in the information on each and

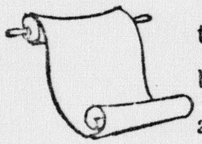
We will now discuss some of the materials included in your promotional package. These are designed to assist you in obtaining additonal prospects for your auto consumer service through mailing. First, we will discuss the introductory letter used by brokers. Read it through, and you will see how this letter can help you by creating the interest in potential auto buyers, to inquire further and increase your potential. This letter can be mailed to friends, acquaintances, and other people, and to leads obtained by various means through your customer contact program and by consulting your local telephone directory for names and addresses of people. A follow-up call and appointment must be made to discuss your unique auto consumer service with the potential auto buyer. This will increase your profit potential.



Next in our discussion of materials in your promotional package is the "Form 1212" series. These brochures may be changed or we may make additions to the series. These additions will be identified by a letter such as 1212A, B, etc. These brochures are for the purpose of adding additional information in your mailings or they can be used as office handouts by brokers.

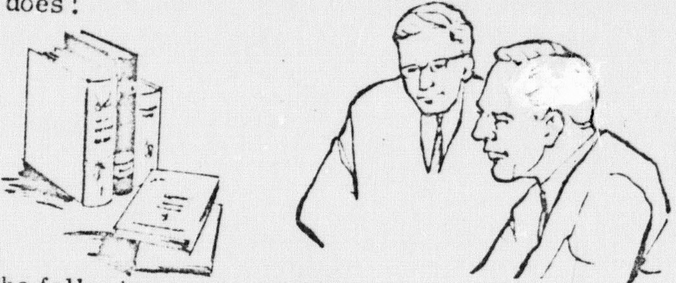
The next form to be discussed, DEAPR-2222, is a supervisory bookkeeping form. See Fig. 7. You will find this form self-explanatory. Look at it, study it. You will fill out your daily income and outgo by date, a description of what the money was spent for, or what it came in for, your identification numbers, and so on. At the extreme right-hand side of the form you have a profit or a loss column (plus or minus) and a cumulative figure column. You can look at the cumulative figure column at any time during the month and be completely aware at all times what your profit is. This is an extremely important form to you. Your accountants are not able to give you this information on a daily basis — this form does!



The following forms are reporting forms that are essential to our system. First is Form NTM-3 (see Fig. 8), the Nabcor Broker Daily Report. It follows our 5-10-15-20 program, and is self-explanatory. Brokers will use this form to report daily, and will forward it to the person in charge of their area.

The next form is Form NTM-2, the Nabcor Broker Weekly Report form (see Fig. 9). It, too, is self-explanatory; it must be completed each week and forwarded to the person in charge of their area.

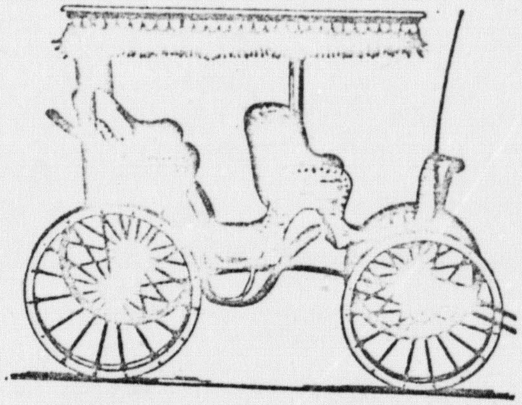
This concludes our discussion on forms. We will refer to these from time to time during our lessons so that you can more fully understand their meaning, value, and necessity. Please remember that these forms have been extremely costly and there has been much work and thought put into them. They are there for your benefit; to help you succeed, make you aware of what your costs are, what your profits are, and how your business is doing at a glance.

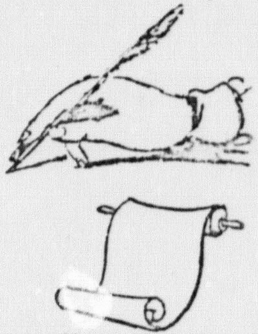
The next lesson deals with bookkeeping.

End of Lesson 1



LESSON 2

Lesson 2 deals with bookkeeping and ordering automobiles. We will deal first with ordering automobiles. After you have completed a purchase agreement with your customer, send the original, properly signed, to the person in charge of your area along with a deposit of 5% of the suggested retail price, or $100, whichever is greater. On Cadillacs, a 10% deposit is required. Any order of a special nature concering equipment, engine, transmission, transmission, optional equipment (not normally ordered or considered odd or undesirable for stock by the industry) will require a 10% greater deposit. The amount of deposit will be at the discretion of Nabcor. Send your customer's check in with your order. You will receive confirmation when the order has been placed; that completes the ordering procedure.



We have already covered the various forms on bookkeeping. Study these forms at this time. On the first day of the month, set up a section in your filing cabinet for that month. Subdivide this section by means of folders headed "Purchases," "Broker's Commissions," "Petty Cash," "Monthly Bills," and for any other category you feel necessary.

Put all of your Purchase Agreements and all order conformation copies in your Purchase folder, petty cash receipts in the Petty Cash folder, bills for rent, electricity, telephone, etc., in the Monthly Bills folder, and so on. Using this

E-565

method, your accountant will be able to come in once a month and give you a picture of your business much more quickly and efficiently. Your wife may be able to keep books for you, or you may do it yourself by using this system. It is a simple matter.

Let me repeat — Purchase Agreement forms and copies of Purchase Orders and Confirmations on cars ordered from us go in your "Purchase" folder. Broker's commissions go in the folder marked "Broker's Commissions," petty cash receipts go in the "Petty Cash" folder, etc. This is being emphasized because it simplifies your bookkeeping system and makes matters easier for your accountant. Remember, his time is your money.

You, your wife, or your bookkeeper can enter these records in a ledger. This leaves nothing more for your accountant to do than to take care of your tax records, keep your journals properly, and make sure that your taxes are paid.

Naturally, your checkbook and monthly statements from the bank are part of your bookkeeping system and must be kept in order. These items, plus the form showing your cumulative profit and balance each day, and the folders mentioned above constitute your entire basic bookkeeping system.

We do not insist that you use this particular system. Your accountant may tell you to use a different one. We offer this to you only as a cost-saving suggestion.

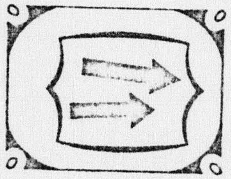
End of Lesson 2.

LESSON 3

We feel that we should acquaint you with the used car aspect of our system before we go into the solicitation programs. Used cars can be handled in many ways. Until such time as you apply for and receive a dealer's license for retailing used cars, you would wholesale all used car trades. The way to wholesale used car trades is to make contacts with used car dealers.

Call several retail used car dealers in your area, and find those who are interested in purchasing used cars. Used car dealers are always interested in buying used cars. This is how they obtain their used cars — they buy them from dealers who trade them in on new cars. They will be only too happy to give you a price for the used cars you are trading, and to buy them at the time you deliver the new cars.

Assuming that you have made the proper contact with several used car dealers, call the one you think would pay the best price for the car you are trading. I say this because some dealers would have a market for Chevrolets, Fords, and Plymouths, and some would have a market for Buicks, Cadillacs and other large automobiles. In this instance, you would call the dealer that has a market for the 1962 Chevrolet which we discussed in Lesson 1. He will give you a price on the car. Let us assume that he says the car is worth $300. You describe the car to him, explain that the interior is clean, the tires are like new, it is a low mileage automobile, there haven't been any accidents, and there is no evidence of damage to the car. You must describe the car properly. The dealer says what the car is worth; what he will pay today. You must assume that he will always find one or two things wrong with the car and allow yourself a $50 difference for this eventuality; therefore, figure the car for $250. Put the wholesale value of $250 on your Purchase Agreement form.



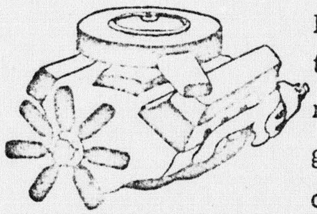
Assuming that it will take a month to get this automobile, you ask the used car dealer whether the price will hold for a month. He might then tell you that the market could drop off about $50. You should then figure $800 for the trade. He might say that the market will hold and he will still be willing to pay $250 next month. If it is spring or early summer and the used car dealer is anticipating an increase in the market, he may figure the car for a wholesale price. However, it it is late fall, he would anticipate the $50 market drop so you would figure it for $250. You should adjust accordingly since you allowed $1,000 for this car. You would, in effect, be allowing a $800 discount, and putting a $200 wholesale figure on the car for the trade. Your cash difference was $3,000 and you add the $200 wholesale trade to equal the $3,200 your purchase agreement calls for in Fig. 1.

At the time of delivery of the new car, the used car dealer will come to your place of business, take the

automobile you have traded (1962 Chevy), and give you a check for $200. This turns the entire deal into cash. He takes the trade; you have the cash. You add this to the cash difference of $3,000 (as shown in Figs. 2 and 3) and you will have a total of $3,200 — the price you agreed upon which includes your broker's fee. There also are auctions that give you the latest auction reports every week. If you decide to auction a car, when you are ready and able to do this, we will advise you which auctions are available in your area. You will be able to take cars there and get top wholesale prices if you are not satisfied with prices in your area.

You may decide at some later date that you want to retail used cars. Let's take the same 1962 Chevrolet in this case. This may be a good second car for one of your customers. Many husbands are in the market to buy a good car for their wives to use for shopping and so forth.

One of your customers may have remarked, "If you get a good clean car that I could buy for about $500 or $600, let me know. I would like to buy a car for my wife." This is the person you would immediately call for that particular car. Here's a car he might pay $500 or $600 for. This would give you an additional income Nabcor could help you with when you are ready. You will have a Used Car Appraisal Guide in order to help you determine the value for yourself. (We will give you copies of this guide.) Take a pad and examine the prospect's automobile. You will record on this pad whatever is necessary to bring the car to its original condition other



E-567

than normal wear and tear. You must drive the automobile, or have your mechanic drive it, to determine if the car is in good mechanical condition. You will then record any needed repairs and their costs on your pad. You will then refer to your Appraisal Guide to determine the value of this car assuming it is worth $300 and assuming repairs total $100. You will deduct $100 from the $300 to arrive at the $200 wholesale figure.

Don't underestimate on reconditioning costs! For example, if it needs some mechanical repairs, such as a tire, a clean-up, and seat covers, you may have estimated the work at $80. Allow yourself a $100 safety margin for repair, and appraise that $300 car for $200. At that time, make your call to the used car dealer, and if he offers you approximately this price, you will use it as a basis for your allowance to your customer. This is one way you can arrive at a wholesale figure.

With practice, you will become more proficient, and in time there will be many automobiles on which you can make a very educated appraisal. But don't depend on guesses! If you are going to wholesale the car, call the used car dealer and have him look at the automobile to give you a firm price. That's the businessman's way of doing business.

LESSON 4

In Lesson 4, we introduce you to the 5-10-15-20 program which has long been established in the automobile business as being a very effective method of customer contact without the expense of advertising. Since you handle all makes and models, the program that we will outline here gives you access to all potential buyers. If you follow it diligently, you should conclude at least one purchase agreement each day.

You must make five personal contacts, ten telephone calls, fifteen mailings, and twenty indirect contacts each day. This system has proven itself time and time again. You will find this a program which is simple and extremely effective.

We will start with an explanation of the five personal contacts. Talk with five people that you come in contact with during the day or make it a point to visit five new people that you have not contacted before. Ask them if they are interested in purchasing a car, the type of car they are driving now, would they be interested in purchasing a car now, or in the near future. Get into a conversation about automobiles and explain who you are, the concept of the Nabcor System, and how you can handle his automobile purchases much better because you handle any make and model.

Explain how you can give advice on which automobile he should purchase and the many other services which you can perform. This will produce leads — this will produce buyers.

E-568

Number 2 in the program is ten telephone calls. Whom do you call? You call friends, neighbors, and people that you work with. When you exhaust these sources, the most effective proven method is to take the telephone directory, start with the A's and call ten people per day — five days a week — each and every day. You say something like this: "Hello, my name is Mr. Broker. I am the Nabcor automobile broker in this area. I handle all makes and models, and I can handle your new car purchase at a much lower price than a dealer can. I also offer services which you have never had before." Usually, this will get people interested. You can use any other approach that may be effective for you as an introduction.

Perhaps that person says, "Oh, I've just bought a new car," or, "I'm not interested in purchasing a car at this time." If so, ask him if he knows someone he might recommend who may be interested in purchasing a car at this time (you thereby get a lead). Should that fail, ask him if he would like to earn extra cash by recommending people to you and you will pay him part of your fee if it results in a car purchase through you. You are then doing what is called "creating a bird dog." This man would then call you when he finds someone who is interested in purchasing an automobile, and you have a very definite lead on someone who is ready to buy immediately.

Number 3 of the program is fifteen mailings a day. You mail out fifteen introductory letters and/or brochures to fifteen people in your area from the listings in the pages of the telephone directory or the leads. If you desire, we will supply you with listings of all the automobile owners in your area. These listings will give you the name, the car they presently own, the make, and the model. You could contact them by mail or phone. If you want to use listings, we can obtain these for you at cost and we will be glad to supply them to you. The source you use is your decision, but whatever the source, if you will make fifteen mailings a day — you will get responses.

The next step is twenty indirect exposures. To establish twenty indirect contacts per day, you must first set up assistant brokers or bird dogs, as they are more commonly called. To effect this, go to gas stations, garages and body shops, driving schools, insurance brokers, etc., and offer them a fee (from $15 to $25 is considered normal) for any lead that results in a car purchase through you. These contacts will in turn contact many potential car buyers each day and refer many leads to you, since these people are in contact with automobile owners in the normal course of their business. You will have no problem getting twenty indirect contacts per day through them. These contacts could be your most important source of leads. They will be anxious to give you leads because in this way they will be assured of keeping their customers — the gas customer, the service customer, the insurance customer, etc. You must follow up on your associate brokers or bird dogs daily.

This is your 5-10-15-20 program, and if you follow it diligently each day, you will be pleased with the results.

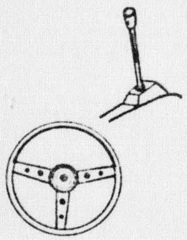
End of Lesson 4

LESSON 5

Lesson 5 discusses the Nabcor System Price book. Although you have already been introduced to this book, we will take the time during this part in your price book and to further familiarize you with it.

You will notice at the top of the page the makes. Under each make you will find listed the standard equipment for the various models — Chevrolet, etc. For example, in your Chevrolet series, standard equipment is listed for Corvair, Chevy II, Chevelle, and Chevrolet. Notice that there is a code number on the left-hand side of the page beside each item. You order the car and equipment by its Nabcor description and its code number.

Whichever model is chosen, add the total cost plus the freight, which is your cost price. This is the Nabcor cost and does not include your broker's fee. It includes all charges except transportation to your place of business. The suggested retail price is the price charged by automobile dealers. This price does not include optional accessories, nor does it include optional engines. On most cars, the standard engine is a 6-cylinder engine. Therefore, you must refer to your accessories section and add whatever the customer desires — power steering, power brakes, etc. You look up these accessories, take your cost and the suggested retail price, and fill in the suggested retail price on the purchase order form. You would then add the cost figures on a separate sh[illegible] arrive at the total cost of the car.



Until you get accustomed to figuring costs, it is a go[illegible] idea to say, "Would you please excuse me, I want to go back and compute my costs." Walk into another room to add up your costs so that it is not done hastily and you don't make a mistake.

But, in most cases, it is better to go over the prices with your customer. He will be able to see your costs and recognize that he is saving many dollars.

E-570

LESSON 6

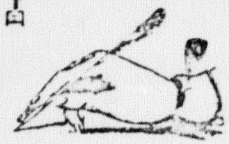
Lesson 6 discusses the most important part of your training — closing techniques. You may get all of the leads, all of the prospects, and talk to many people, but if you don't get the order, you don't make money. This holds true no matter what business you are in. If you don't ask for the order, you never get it. With automobiles, a large-priced item, this requires a certain amount of tact and diplomancy. At the specific time that you feel you have eliminated all doubts from your customer's mind as to whether he should purchase this automobile through you, don't be afraid to ask for the order. Sometimes, just the fact that you suggest, "Mr. Jones, sign this agreement so I can order your car as quickly as possible to avoid delay," will have the desired effect. If you don't ask for the order, he will probably say, "Well, I'll think about it," and you may lose him. Therefore, we repeat, don't be afraid to ask for the order.

First of all certain techniques are required for getting to the point where you can agree on the price. Always start with the suggested retail price of the new automobile. On no-trade-in deals, add your broker fee to the Nabcor cost. If there is a trade involved, the trade should be considered at the wholesale value and added to the discount. Assume that you have a $4,000 car as discussed in the Purchase Agreement used in Lesson 1. You say, "Very well, Mr. Jones, I am ready to give you an extremely good deal. Would you be ready to buy this car today?" He may say "Yes" — and he may say "No." If he says "No," you should ask him when he would be interested in buying a car. He may say he needs two or three months until he gets his car paid off. That is a question you can answer immediately. You say, "That's no problem, we can pay off your car right now and include it in your payments on your new car." You will have to practice overcoming such objections.

Remember to remind him that he is getting the car at Nabcor cost price. He pays you the small broker fee for effecting this purchase for him. There is no need to stop or haggle, because he will realize that he is buying at the lowest possible price. You can point out additional savings in time and effort, gasoline cost, and in saving wear and tear on his car by not having to shop all over the area for a discount price which will not equal yours. Point out that, since he knows he is getting the lowest possible price, there is no need to wait or postpone his purchase. He can order his new car immediately and start enjoying his new car much sooner. At this point, ask him to sign the purchase agreement. Through practice, you can perfect additional techniques.

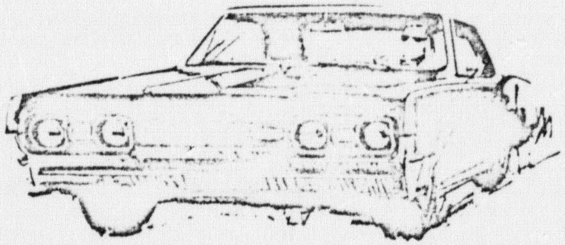
At the time he says, "Yes," stop talking and take his order. Remember, when you sat down to talk to this customer, the first thing you did was take his name and address and then listed the equipment he wanted. At this point you say to him, "How much deposit are you going to leave today,

E-571



Mr. Jones, $1,000?" He may say, "No, I don't have that much in my account, but I can give you a check for $500." You reply, "That's fine. We'll put a $500 deposit on your order." Give him the order — let him sign it. Now you say, "All right, Mr. Jones, if you want to make out your check, I'll make out a receipt for your deposit." You have then closed the deal for your deposit. Now he will probably want to know how soon he can have his car. Explain that it will be four to six weeks, barring any unforeseen contingency such as strikes, etc.

End of Lesson 6



LESSON 7

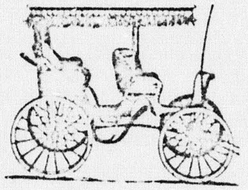
In this lesson we discuss the follow-up. You can get valuable leads by this method.

Two or three days after the man has taken delivery of a new automobile, follow it up. Call, but don't ask him, "How is your car?" That is a foolish question. It might infer to him that you may enjoy listening to his minor complaints. It well may prompt him to make you happy by inventing a list of squeaks, rattles, and complaints, and get off on a tangent that will simply eliminate the purpose of your call. What you should do is say, "Mr. Jones, I just called to find out how you are and to find out how your neighbors like your car." Direct your conversation into the proper channels. Ask, "How did your neighbors like your car? What reaction did you get when you took your automobile to your place of business — to your office — to your place of employment? How did the people like your new automobile? Did you get any comments on it?" He might answer, "Oh, yes, they thought it was beautiful. In fact, two or three people liked it so well, they are going to buy a car just like it." There is your cue — two or three people said that they would like to buy a new car. Get their names — "Mr. Jones, who were these people? If you don't mind, I would appreciate it if you would give me their names. I'd like to call them and give them an automobile deal as good as yours." He probably will give you their names. You can say also, "Mr. Jones, if these people buy cars, I would like to get you a spotlight for your car," or "a set of special hubcaps," or (if winter's coming along), "Mr. Jones, I would be glad to buy you a set of

— I don't know if I can hold this price for you — the sale might be over today or whenever the sales manager decides to end the sale," or, he may say, "I can give you an extremely low price today because I have a buyer for your used car." What happens when the customer comes back? The salesman tells him that the sale is over, or, "I'm sorry, Mr. Jones, I did have a buyer for your car but I don't anymore," or "The sale is over. We had a special and I practically begged you to buy the car that night, but I'll tell you what I'll do, I'll talk to the sales manager and see if I can get you a price almost as low — sit down and let me see what I can do for you."

This is the way a salesman gets a chance to sell a customer again, after giving his low-ball. You will be exposed to this in the automobile business. These are some of the things you must watch for and understand, because it does exist and most salesmen use it. In this very tactful manner the salesmen are able to give this customer a price they cannot live up to. They do it in such a way that they can get out of the deal very easily without putting themselves in a position where the man could say, "You deliberately lied to me." When a man like this comes to you, you extract from him the low-ball price.

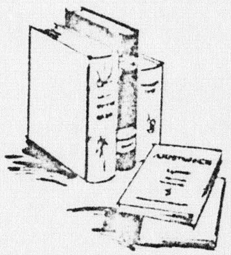
When you check your price book and find that this man has a price at your cost or slightly over your cost, you know you are competing with a salesman who has given this customer the famous low-ball. You know that this price is impossible. You know that the dealer will not sell the car at this price since very often the low-ball is even under cost. How should you offset this low-ball? Ask him if his used car was driven.



The salesman will, in most cases, look out the showroom window and say, "It looks like it's in pretty good condition. It looks as if you kept it pretty nice, Mr. Jones. Is there anything wrong with it?" Mr. Jones will, of course, say, "Oh yes, it's in good condition, nothing wrong with it." The salesman answers, "That's fine." Now he has allowed the customer to trap himself and he will give the customer a price based on that flimsy appraisal. If Mr. Jones says, "No," when you ask him if his car was driven, remind him that a sales manager will have to drive that car, and that he will find something wrong with it. If the dealer invents an imaginary knock in the engine (which will entail an expensive overhaul, and because of that, the possibility of replacing a slipping transmission), it will enable the dealer to negotiate, and extract another $450 from the customer. If Mr. Jones objects, the dealer would say, "But Mr. Jones, you told us that the car was perfect." Mr. Jones will have to agree that it was his fault. This is one way you have of offsetting the low-ball. Explain to him that the car must be driven and appraised by the manager and that he will very likely run into a reappraisal situation. Explain that this is not a bona-fide offer and that he has left the salesman off the hook. The fact that he did not buy then and there relieves the salesman from his seemingly legitimate commitment to live up to the price that he gave, and the customer won't get that price when he goes back.

Ask him whether the order was signed by the owner. Sometimes your Mr. Jones may have an order with the price on it signed by the salesman. Most orders, as you will see on your Purchase Agreement, are not binding unless they are countersigned by either the General Manager or by the owner himself. If you see an order of this type and you find that only the salesman has signed it, explain to your customer that it is not a binding order on the dealership. They do not have to honor this order. The customer will be told that he has to pay more since the manager will claim that it is a mistake and will not approve this deal. Explain this to your customer. That's another way of offsetting the low-ball.

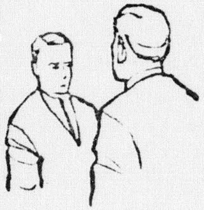
Another very effective method (in addition to those already outlined) would be to pick up the telephone and call the owner of particular dealership, if you know the dealer will not live up to this contract, especially if the price is at cost or under cost. Tell the dealer that you are Mr. Jones and that you have an order for a new car signed by his salesman, and you're ready to put down a deposit. Usually when you ask for the owner, a sales manager will come to the phone instead. Don't explain this to him because, after all, it's his salesman who has set up this particular deal. He will invite you to come in and discuss the order (his purpose being to up-grade the deal). Get the owner, himself, on the phone and say, "This is Mr. Jones," and have Mr. Jones on the extension. Say, "I have an order signed by your salesman for this price and I want to make sure that you will live up to this price. I want you personally to sign the order." When you pin the owner down to this he will begin to dodge the issue. At that point just say, "Thank you, I'll be there tomorrow," and hang up the phone. Confront Mr. Jones with the fact that these people were evasive, which only verifies what you had told him — that they are not going to honor this low-ball.



At that point, convince your customer of your security and say, "Now look, I can give you a decent price if you want to purchase an automobile." Take out your price book and ask him point-blank, "Look, am I entitled to $150?" He probably will say, "Yes." (Show him your cost book.) "These are Nabcor costs; let's write up an order." Your customer will probably sign an order then and there.

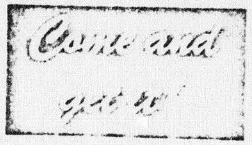
We have outlined here some of the ways to offset that low-ball, and if you learn to offset this, you will get many more orders. Too, you will not have the exasperating, irritating, demoralizing experiences that go along with having a man sit there telling you that he is getting a car at cost. Allow yourself to believe him and you will begin doubting your ability, your cost book, your business, your company, and worst of all, you will destroy your morale.

A dealership has a fixed expense structure of approximately $450 per unit. They operate on a volume concept, and they may make a deal as low as $150 over the house charge. A dealer has a fixed cost of $75 per unit (which is "get-ready"), floor payment, interest, and incidental items that may be stolen, missing, or damaged on new cars on the lot. It has been established that it costs a dealer $100 per car for floor payment, interest, and get-ready. The salesman doesn't get paid a commission on this house charge. This is out-of-pocket cost and known as a "house pack." This is approximately the same cost as you have. A dealer may go down to approximately $150 over house pack to get rid of an undesirable car in his stock — a car that has been in his stock for over 90 days or one which he may want to get rid of, such as a demonstrator that has been cleaned up. He may sell cars of this type as low as $150 over his house pack, and he must pay the salesman a $35 commission. A dealer certainly doesn't go any lower than this. These sales must be offset by the $600 or $700 deal. His average deal, in even the low priced cars, is usually around $350 to $400, and in some areas, as high as $600. In a rural or suburban area, away from a large city, the average is usually around $500. But, remember, taking into consideration his buildings, his rents, his sales manager's salary, his office girls, porters, his insurance, floor payment interest, and all of the expense associated with his dealership, his costs are approximately $400 to $450 for every car sold. He may make one or two low deals, especially on undesirable units, or demonstrators, but he does have to make most of his deals in the higher profit ranges.



Don't be fooled by rumors about dealers selling below cost. Dealers will advertise price leaders designed to bring customers into the showroom for the purpose of switching them into a higher priced model, a model with which they aren't familiar, thereby raising the profit. The ads are designed to bring customers into the showroom so that the salesman can talk to them, switch them to another automobile, and make a high profit. These advertisements that you see in the newspapers or that are brought to your attention are generally not available. They are usually leader ads on a specific unit without equipment. The dealer must add equipment to these cars and thereby increase the price.

There are many gimmicks in advertising. A good example may well be your department store which may advertise silk stockings at $.50 a pair. You go to the department store and they have just one bin — maybe a hundred pairs of silk stockings all mis-matched and mis-colored. There they are and no one wants them. But, they do get the lady of the house into the store, and while she is there, she shops at other counters and buys something else.

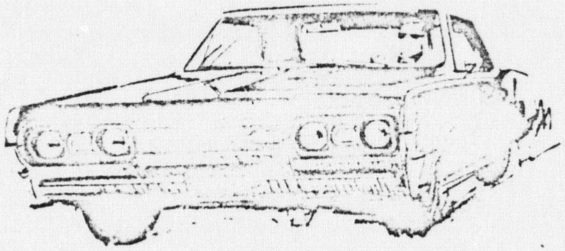


The new car dealer does the same thing. He will put in a price leader — he may not even have a car of that type in stock and, if the customer insists on it, he will order it for him only after he has talked to a salesman, a manager, and a general sales manager, and they have all failed to switch him to something else. Bear this in mind, and remember that you have the price advantage over your dealer. Recognize the low-ball system; to offset the low-ball, use the

E-575

methods outlined to you in this lesson, and methods you will devise yourself as you become more experienced.

End of Lesson 8



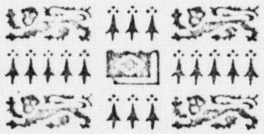
LESSON 9

After you have mastered the Nabcor brokerage system, you can go into Phase 2 — Used Cars. You can set up a used car operation. This requires a state license and a facility. This is another phase of the automobile business — retailing used cars. It may be some time before you are ready for this phase. In Lesson 9 we will discuss used car sales, and will instruct you in some of the aspects of used car preparation and retailing.

In order to retail a used car, it must be repaired (body work), cleaned and polished, and any mechanical defects corrected. Most gas stations know how to clean and polish a car. Using a compound and a buffing machine, they will take road haze from the paint and bring it up to its original natural lustre. Many times you will find that road haze on an automobile has caused the finish to become dull. This compound and clean-up will restore the finish to its original, like-new condition. They also will shampoo the interior and clean the motor to give the car a well-taken care of look. The trunk mat and tires should be painted. These people usually charge a used car dealer approximately $25 for this clean up. This price should also apply to you on this particular automobile. It would pay you to contact your wholesale tire dealer who has what are called new car take-offs — these tires are good for used cars. You can buy them at reasonable prices. They cost you approximately $15 per good high-tread tires. If it is a late model (2-year old car), it may be advisable to replace the tires with five matched tires. The car, cleaned, tuned, and running properly, is worth more at wholesale or retail. This is the way to prepare a used car for sale at either retail or wholesale auction.

The mark-ups on a used car are anywhere from $300 to $500 over the wholesale price. Most used dealers will seek these markups. On a lower priced car they would want to make no less than $300, and on a higher priced car, certainly no less than $500. Consequently, a car that has a $600 wholesale price would probably be priced at $995 and may come down to $900. A car that would be priced at a wholesale value of $1,700 would most likely be a $2,295 car at retail.

In order to obtain leads (other than advertising) for used cars, we will list a few suggestions. A good source of leads for used cars, naturally, are the customers you have dealt with. In most cases, when a new car is purchased, it is usually for the man in the family — he must go to work with the automobile. His wife can become a little envious, or may have as great a need for a car as the husband. Therefore, contact your customer in a week or so and ask him if he needs a second car that wouldn't be too expensive. This payment he is making on his present loan is a source for good used car leads.



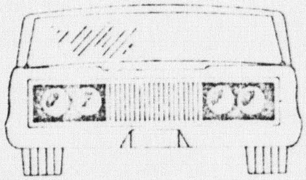
In advertising, classified ads are usually the best. People, when looking for used cars, look in the classified ads. They may want a Buick — they will look in the Buick section. Therefore, you should advertise in the classified section. It is inexpensive and results in sales of used cars. Through the ad, you will get several people who will call and want to see the car. If your car is cleaned up properly and it looks good, they usually will be interested in buying the automobile. They may bargain on price a little, but generally they do want that car. Remember, a used car is not like a new car. People do not have the confidence in used cars thay they have in new cars. They know that a new car is good — new cars are warranted for five years, and so on. There is no question in their minds that they will get a good automobile. Used cars are something different. If you have not prepared the car properly — if you have left a little bit of damage on the car, if you have left a few dents on the fender, if there is a piece of torn upholstery that you haven't had the local upholstery man replace — these will most likely kill the sale. This could mean a loss of profit to you. If you're interested in retailing that used car, you must make sure that these things are done before you show your customer the used car. That slight tear in the upholstery could, in the customer's mind, make him feel that the car is now worn out. He doesn't want to buy someone else's troubles. Bear this in mind when selling used cars. Analyze this. Go over your appraisal sheets, and acquaint yourself with the used car market. You will find in no time at all that you will become familiar with used car prices in your area. Nabcor will give you any additional help and assistance necessary.

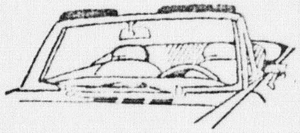
End of Lesson 9

E-577

LESSON 10

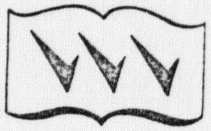
In this lesson we discuss financing. People will in some cases have their own bank, but in most car purchases, your customer will want you to handle the financing for him. Take into consideration some of the advantages of placing finance and insurance for your customer. This is an additional source of income for you. Many people buy on time. Most people do not pay in cash when purchasing an automobile. Whether you are arranging financing for the customer or he is arranging it for himself, you should become familiar with payment schedules. Many people will say, "I'm not interested in how much the car will cost me, but how much will my payment be per month." If they don't say this, you should ask the question, "Well, are you going to pay cash?" or "Are you going to need financing?" Incidentally, this is part of qualifying.

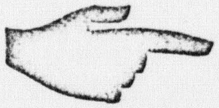




In the initial stages of your conversation, you ask the customer what type of car he is driving, whether the car is clear of encumbrance, if he still owes money on it, and can he use this as a down payment. Those are the qualifying questions during the course of your discussion on this purchase. You may say to him, "Evidently you financed your last car? How much are you paying per month?" He may say, "I'm paying $92 per month." You then ask him, "If I can give you a car for the same payments, would you buy it today?" Now you have gotten away from whether it is

$2,000 plus his car, or $3,000, or any cash difference. Now it has become a payment situation. He may say, "If you can keep my monthly payments the same, I would buy another car." You then look up the $92 payment in your payment book. A $92 a month payment on a 36-month chart at the rate of 6% interest would be a net to you of $2,802. Assuming that he owes $300 on his old car, you would have a net of approximately $2,500 plus his car. Let's say there are taxes and title fees of another $100. Deduct this $100 and you now have a net of $2,400 plus his car. Let us assume for this example that his car is worth $800. The net, $2,400, plus $800 equals $3,200. If this is the price you need (as in Lesson 1) you would then say, "Fine, Mr. Jones, we can get you this automobile for $92 a month." You then have him sign a purchase order. You get your deposit, and complete the order. This is how to switch from cash difference to payments. Used this way, financing can help you complete a car purchase for your customer. In your promotional material there is a finance payment chart. This chart is based on a 6% interest rate (which is normal interest charged on a new car). We will review this chart with you We suggest you familiarize yourself thoroughly with this chart. The 6% payment chart starts at 12 months and goes up to 36 months, and ranges from $1,000 to $3,000.



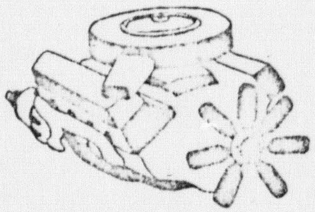


For example, if the customer wanted to finance $3,500, you find $3,000 in the "Unpaid Balance" column. Then you go over to the "36 Month" column under the

"Payment" section, you will find $98.33. In the "Unpaid Balance" column, you will find $500. Again go to the "36 Month" column, and under the payment section you will find $16.38. Add these two figures ($98.33 and $16.38) for a total of $114.71. This will be the monthly payment at 6% on $3,500.

To figure the total amount of a note (amount financed plus the interest charge — in this case 6%) let us again use $3,500. Find the total "Amount of Note" for this amount. Again, you find $3,000 in the "Unpaid Balance" column. Then go over to the "36 Month" column and under the "Note" section, you will find $3,539.88 and $589.68 for a total of $4,129.56. This will be the total amount of note or contract.

For odd dollar amounts, you will find that the chart shows "Payments" and "Amount of Note" for $1 through $10 and $20 through $90. These enable you to find the exact amount of payment and note for any amount you desire to the closest dollar.



There is also another way. Your state may allow anywhere from a high of 7% interest rate to as low as 5% or lower (which you may reduce it to). The way to compute that is as follows: For example, let's use a 5% interest rate and $2,722 as "Balance to Finance." You multiply .05 times "Balance to Finance" — .05 times $2,722 would give you your interest — $136.10. Add it to your Balance to Finance ($2,722). Now remember, .05 times $2,722 gives you the 5% interest for one year. For three years, you must multiply .15 times "Balance to Finance" ($2,722) or three times your one-year interest ($136.10). This gives you the interest of $408.30 for three years. Add the three-year interest ($408.30) to "Balance to Finance" ($2,722) which will give you the "Amount of Contract" or "Note" for three years ($3,130.30).

Using the 6% rate times three years equals 18%. Multiply .18 times $2,722, which gives you the interest on 6% for three years, or $489.55. Add this to the $2,722, which gives you $3,211.55. Then divide $3,211.55 by 36 for the monthly payment of $89.21. When you are dealing with pennies, go to the nearest whole number, giving the customer the benefit of the doubt. That is the way to determine interest and payment rates yourself, without a payment chart. These figures were used as an example.

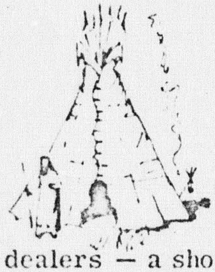
LESSON 11

Lesson 11 deals with the various types of facilities a Nabcor Broker can work from. There are various plans adaptable to the Nabcor System. A broker needs only a well-appointed office which can be a room in his home, which has been converted into an office, as long as it is clean, well kept, and dignified. In short, it must be a place where a broker can take a man and his wife to discuss an automobile pruchase. There are brokers who have rented booths and established facilities in large mall-type markets. The flow of traffic in these markets exposes the broker to many potential customers.

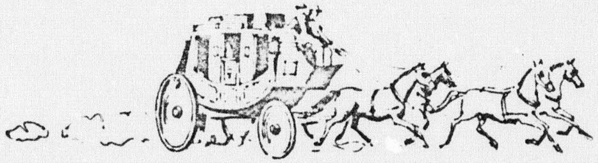


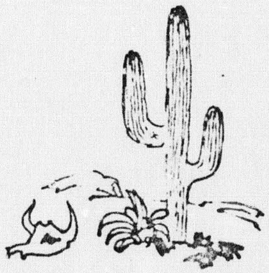
There are brokers who have established a well-appointed, clean office in large service stations. There are brokers who have gone into more elaborate facilities such as the small showroom typical of the foreign car dealers — a showroom display and about eight or ten "outside" display areas for used cars.

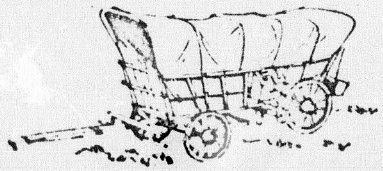
Naturally, all facilities must be neat and orderly. A run-down facility — a gimmick type like facility — a hangout-type operation will only attract the type of people who would go into that type of facility or office. The better type people — the people who can afford and do purchase new cars — will not approach that type of a facility.

You would do well to keep this in mind. Keep your expense structure low. Keep in mind, when planning a facility, there are so many aspects involved in the various types of facilities that can be used, that this is a matter for further and more elaborate discussion should you decide on a special type of facility. We are available for consultation on this. Remember also that a facility will not sell cars for you. It can expose you to people who may be interested in buying cars if you are in a good location, exposed to traffic, and if you have an outdoor sign properly displayed in the showroom window or office window. It will help attract people to your place of business and will add to your business. However, you must follow the basic methods of customer contact that have been outlined for you in the Nabcor Training Program in order to succeed, regardless of the type of facility you have.

End of Lesson 11

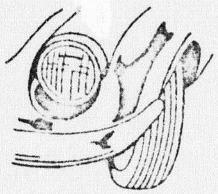






LESSON 12

In Lesson 12 we discuss some of the questions and problems that you may become involved in and the answers to these questions and problems. Some of your customers may ask you, "How soon will I get the car?" Your answer to a question like this will be, "As soon as any dealer can get you an automobile" or "Four to six weeks." When a car is ordered, it takes the factory the same amount of time to build an automobile whether it is for a local dealer or a Nabcor Broker. You certainly could get an automobile to him as quickly as a local dealer. Your customer might ask, "How about service? I understand that within 35 miles I have to take the car back to the selling dealer, and some of these dealers may not do it."



Remember that this is extremely important! There is no such thing as a 35-mile radius! The manufacturer is responsible for the warranty. In all of his advertising media, the manufacturer advertises that he will warrant these automobiles for a certain time and/or mileage. It is not your responsibility, nor the local dealer's, nor Nabcor's to warrant these vehicles. It is the manufacturer's responsibility. In all media of advertising, as an inducement for the public to buy a particular manufacturer's product, each manufacturer states that cars can be serviced at any dealer representing that particular make in the United States or Canada. There is no 35-mile radius as long as the warranty is kept up through proper maintenance, and the manufacturer's requirements, as set forth in the warranty book, are met. Changing the oil at specific times and bringing the warranty to a factory dealer for validating, etc., makes sure that the warranty is kept up to date. Except for this, it is not even necessary for the customer to bring the car back even for oil changes as long as he has a record that the oil was changed at the interval periods mentioned in the warranty.

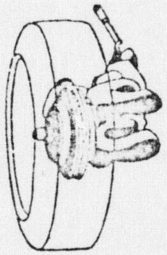
Your customer may get some resistance on a squeak or a rattle that is not under warranty. The dealer may tell him that he will not service that car because he did not buy it there. He would not service a rattle or squeak on that automobile whether it was bought from a Nabcor broker or from a factory dealer. Therefore, customers buying an automobile, whether from a factory dealer, or from a Nabcor broker, would not get that squeak or rattle eliminated unless he paid for it. Rattles are not a warranted item. The dealer does not get paid for this. A dealer will do any work that is under warranty, and the factory pays in full for this work. The squeaks and rattle are not the dealer's responsibility — nor anyone else's — because they are not under warranty. Most dealers will put aside a fee per unit to take care of these non-warranty items. This is why they say to the customer, "Well, if you had bought the car here, I would have taken care of that." These are considered goodwill items that are a necessary cost of doing business.

In order to take care of the customer, you should do the same thing to keep him happy. This can be done very easily by sending him to a reputable local garage to eliminate that

E-581

squeak or rattle. It may cost you two or three dollars, but you have the customer happy. Explain to your customer that he can get warranty service as long as the car is under warranty, but not a wheel alignment or any adjustments that are considered maintenance. Your customer may, after he takes delivery of a car, come back to claim that something was missing and he may bring the car to a dealer to have it replaced. This is something the dealer will not do for him, and the dealer may say, "Well, you didn't buy the car here, and I won't do it." This is something that is not required of the dealer and he would not replace this even for his own customer. It is not under warranty — the piece of chrome or whatever that might have been missing, and, if you believe the customer, you must pay for it yourself to keep his good will. If it was missing and reported to us before delivery, then we pay for it. If we weren't notified before delivery, we assume that it was removed or lost after the car was delivered.

If you feel that you should satisfy your customer, then spend these small amounts and charge them to cost of operations. This is the way you can solve that service problem.



The manufacturer will complete through its dealers any service that is necessary and covered by the warranty. That is the manufacturer's commitment to the public as an inducement for them to buy that particular manufacturer's product. Remember that this is not your responsibility, nor is it Nabcor's responsibility. We do not build the automobile, nor do you. The manufacturer builds it and warrants it, and this makes him responsible. Your customer should be made aware of the fact that when he takes the automobile into a dealership for legitimate warranty work, the dealer will be glad to service the automobile, because he gets paid by the manufacturer.

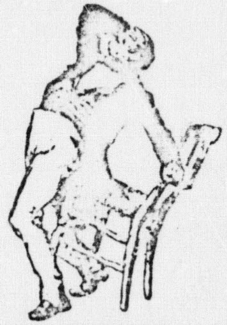
If the customer goes in for "fly-speck" items that are not the dealer's responsibility, then that dealer may use the incident to discredit you. This is not a fault of the system nor of your method of doing business — there is no other way that this can be dealt with. This is a part of the automobile business. Understand this, and prepare your customer for it. There are some things that are your customer's responsibility. There are some things that are your responsibility in order to satisfy your customer, and retain his good will. It may be necessary, as it is in any other business, to spend a small amount of money on items that are not primarily your responsibility in order to retain the customer's good will. Remember, it will bring you additional customers.

A good way to do this is to set aside $5 per unit delivered to take care of some of these items. There may be isolated occasions when, even though the manufacturer insists that its dealers do this work, for which they pay full price, the dealer may refuse. The dealer has three franchises within his dealership — a franchise to sell cars — a franchise to sell parts — and a franchise to sell service, and most dealers welcome this service. When a customer goes in for some minor adjustment, they will usually write a service bill for a lot more than the service work was really worth. In

many cases the manufacturer pays more for service than is really justified; therefore, warranty work is a lucrative part of the dealer's business.

But, we must be aware of the fact that there may be an isolated case where a dealer, who may have been in the business for many years, a man seventy years of age or so — who may be a vindictive individual — who just doesn't care about his franchise anymore. He may be angry with manufacturer, and he may decide that since this man did not buy the automobile from his dealership, he is not going to service it whether it is warranty work or not. This cannot be helped. He is an independent operator. No one can force him to do this work. The manufacturer certainly can't, but they have recourse in situations like this. Once that happens, things become much more difficult for this man. He may even be cancelled. Manufacturers don't think lightly of this type of thing. But these are isolated cases, and by calling the local factory office your customer will be refered to another dealer who will do this warranty work. Sometimes calling the factory district office or writing to the manufacturer in a case like this will cause the first dealer to agree to service the car. But, we'll go to the extreme in assuming that this hypothetical dealer wouldn't want to do the service at all and there is nothing that they can do with him. The factory district office will refer you to another dealer, possibly four or five miles away, who would be only too glad to take care of your car. This is the way you should handle it.

There are other ways to handle service problems. Sometimes inviting the service managers of various dealers to a luncheon meeting establishes more friendly relations. Your customer then receives service as good as if not better than the dealer's customers. Sometimes a veiled threat to the service manager produces the desired result. If you should say, "If you don't service the car then I'll have to call the factory district office to find out who will." This may quickly bring an apology and he may answer, "Oh, no — let's make an appointment for your customer," and he will service the car. There are many ways to handle the situation. We have discussed only the most extreme cases or the most extreme possibilities that may occur. We have not experienced anything like this in our entire history; therefore, in answering the service question for your customer, bring out some of these points. The manufacturer must service the car and the customer has no need to worry. Another point is, most dealers want this service. They do want to build up their service departments. This is a very lucrative part of their operation, and they welcome this business.

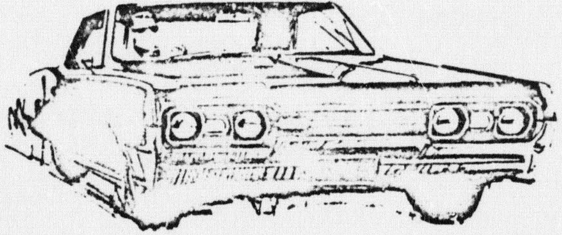


We have only brought out these situations to prepare you for any eventuality. We doubt seriously whether you'll encounter any such problem. There will be many questions that may come up that we can't anticipate in a training program. Local conditions may require additional explanations. We

E-583

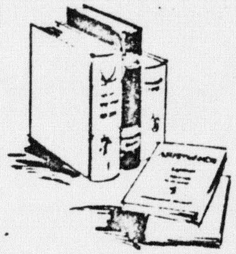
will answer any such questions, or unusual situations that may come up simply by your outlining your question in a letter to us. We will answer it promptly by mail — or during periodic sales seminars that are held from time to time by the person in charge of your area.

End of Lesson 12



CLOSING

We have come to the end of your training program. We wish to point out to you that we have tried to bring out all of the pertinent facts, and we have tried to give you all of the information gained by many years of experience. This is knowledge that has been proven to be necessary to your business information. It is important to know and understand it. We have tried in this training manual to bring out all of the knowledge accumulated in the sixty (60) years the automobile business has been in existence. It is virtually impossible to anticipate every single point, every situation, every problem that may arise. We cannot be specific about each and every detail in all of the situations that can occur.



No one can teach that in a few lessons, nor could anyone absorb it were it possible. We have brought out all of the highlights and all of the most important facts and factors which will enable you to become quite proficient (through experience) in a very short time. By following our outline very closely, you should have no problem in adjusting to this great and profitable automobile business. You can take advantage of the profit potential and prestige that go along with being an automobile broker. We have prepared you in the only way possible; the rest is up to you. Remember that your potential, based on population and cars registered in your area, is extremely high. You only need about 5% of the potential business, or 5% of the new cars sold in your area, to reach your yearly objective. Your minimum quota must be met, and if you diligently follow the customer contact methods and sales techniques that we have outlined in the training program, you will have no problem in meeting your minimum potential and far exceeding it. Remember, you have an obligation to Nabcor to get orders. We expect you to meet your potentials and your goals. Your success is our success. We will try to help you in every way, but we can't give you the incentive to work. We know that if you follow the 5-10-15-20 program which we have outlined in Lesson 4, you cannot help but succeed. We welcome you to our ever increasing family of successful Nabcor brokers, and extend our very best wishes for your success. We look forward to listing you as one of our leading brokers.

15. BROKER agrees that his minimum quota will be Fifteen cars per ninety (90) day period.

b. Said minimum quota shall not become effective until sixty (60) days after the execution of this Agreement.

16. BROKER agrees to pay an annual licensing fee of Five Hundred Dollars ($500.00) for as long as he renews this Agreement.

25. BROKER agrees to allow NABCOR to establish Associate Brokers for him in assigned territory or he may establish Associate Brokers himself based on NABCOR'S approval, terms, and conditions.

26. BROKER agrees that he will not advertise either directly or indirectly through use of a fictitious trade style or otherwise in any manner whatsoever unless such advertisement is approved in writing by NABCOR.

27. BROKER agrees that he will set up his operation and all other matters necessary to his business as soon as possible so that he may handle lease-purchase contracts himself.

28. Upon termination of this Agreement, BROKER agrees to remove and refrain from using thereafter the word "NABCOR" or any name that has been used in connection with the sale of this service including the use of any facsimile thereof on cards, letterheads, advertisements, or in any other manner whatsoever.

29. BROKER understands and agrees that he is an independent contractor and that he is not an agent for nor acting on behalf of NABCOR for any purpose or in any manner whatsoever in the operation of his business during or after the expiration of this Agreement. BROKER agrees to indemnify and save NABCOR harmless from and against all claims, demands, damages, actions, and causes of action, liability, expenses or costs arising out of any transaction participated in or act committed or omission to act by BROKER. If suit is brought against BROKER and/or NABCOR on account of any such transaction or act of omission, BROKER shall, upon receipt of notice thereof, assume the defense and bear all expenses, cost, attorney's fees and liability or damages which may be incurred. BROKER also agrees to promptly pay when due on demand all debts and obligations incurred by him in the course of his business during the term of this Agreement. BROKER'S failure to perform any of the terms of this Agreement shall constitute his breach of this Agreement, which at the sole option of NABCOR shall entitle NABCOR to cancel this Agreement and to retain all payments theretofore made by BROKER to NABCOR under the terms of this Agreement.

30. In the event NABCOR is prevented from performing any of its obligations hereunder by reason of Acts of God, strikes, labor difficulties, riot, insurrection or the act of any government body or by any other reason beyond its control, the delay occasioned thereby or the failure to supply new or used automobiles shall not be considered a breach of this contract.

31. The paragraphs of this Agreement are severable and in the event any paragraph, sentence or word, or portion of this Agreement is declared illegal or unenforceable, the remainder of this Agreement shall be effective and binding

pon the parties. No waiver of any breach of any of the covenants, agreements, or provisions herein contained shall be construed as a waiver of any subsequent breach of the same or any other covenant or provision. This instrument constitutes the entire agreement between the parties and there are no other covenants, promises, or agreements (written or oral) and no agent of either party has authority to make representations or other agreements (verbal or written) which modify or vary the terms or conditions of this Agreement.

32. BREACH OF CONTRACT: Breach of any of the terms and conditions of this agreement or any fraudulent acts or misconduct by the BROKER shall, at the option of NABCOR, be cause for termination of this agreement and all benefits hereof. However, both parties shall have thirty (30) days to rectify such breach. In the event such breach is not rectified any money owing NABCOR under this agreement shall immediately become due and payable.

33. VENUE: In the event that suit is brought by either party under the provisions of this Agreement or any other agreement between the parties hereto, venue shall be in the State of Pennsylvania and in the county which is the current principal legal residence of NABCOR. It is further agreed that for the purpose of interpretation the laws of the State of Pennsylvania shall govern the terms and conditions of this Agreement. Failure to enforce any of the provisions of this agreement shall not be considered a waiver of that provision.

34. Any lease-purchase contract presented to NABCOR and not acceptable to NABCOR because of finance, insurance, or other terms of lease-purchase contracts submitted, may be returned by NABCOR to BROKER.

35. It is further agreed that the term "lease-purchase" as used in this agreement means a program established by NABCOR at its discretion to include leases or purchases or a combination of both.

36. RESTRICTIVE COVENANT: The BROKER further agrees that while this agreement is in force or after termination of this agreement he will not divulge to any person or persons, except in the normal course of carrying out the business of NABCOR, any of the latter's business or sales methods, forms, collection methods, or contracts, correspondence, letters and all documents or copies thereof, pertaining to or relative to the business of NABCOR including lists of customers or former customers and will not solicit same nor use any of the above in any manner whatsoever without the written permission of NABCOR. The BROKER agrees to deliver all such material prepaid to NABCOR at the termination of this agreement. The BROKER also agrees that he will not employ or seek to employ or hire in any capacity any person who is at the same time employed by or representing NABCOR in any capacity and will not directly or indirectly induce any such persons to leave their employment unless the BROKER has obtained the prior written approval of NABCOR.

37. The BROKER further agrees that while this agreement is in full force and for a period of one year after termination of this agreement not to compete in any manner whatsoever with NABCOR in any similar business either as an individual or partner, (active, inactive or silent), corporation stockholder, or company, in any city or county in which NABCOR is engaged in business or is transacting business.

38 INJUNCTIVE RELIEF: NABCOR shall be entitled to injunctive relief and damages should BROKER breach any of the terms and conditions of the restrictive covenants contained in this agreement and that any monies owing the BROKER by NABCOR under the terms of this or any subsequent agreement may be applied as liquidated damages. This provision or the restrictive covenants contained in this agreement may not be waived or modified by any subsequent agreements unless such waiver is specifically mentioned.

39. FILING OF CLAIMS: Any claim whatsoever against NABCOR or other representatives of NABCOR resulting from or arising out of this agreement or subsequent agreements that are not set forth in writing by registered mail within thirty (30) days after date of such claim or within 30 days after termination of this agreement, whichever applies, shall be considered waived. The restrictive covenants contained in paragraph 37 of this agreement shall be construed as independent of any other provision hereof and the existence of any claim in course of action of the BROKER against NABCOR whether predicated on this agreement or otherwise, shall not constitute a defense to the enforcement by NABCOR of said restrictive covenants. The prospective BROKER in consideration of the negotiation between himself and NABCOR that resulted in him signing this agreement agrees to bind himself to paragraph 37 of this sales agreement whether or not this agreement has been accepted, signed, countersigned, or rejected by NABCOR.

E-622

The parties hereto certify that they have read all portions of this agreement. This agreement constitutes the final and complete understanding between the parties hereto and that no other representations or promises, verbal or otherwise, have been made, and that this agreement will not become effective until accepted and approved by the home office in Pennsylvania.

42. INJUNCTIVE RELIEF: NABCOR shall be entitled to injunctive relief and damages should DISTRIBUTOR breach any of the terms and conditions of the restrictive covenants contained in this agreement and that any monies owing the DISTRIBUTOR by NABCOR under the terms of this or any subsequent agreement may be applied as liquidated damages. This provision or the restrictive covenants contained in this agreement may not be waived or modified by any subsequent agreements unless such waiver is specifically mentioned.

If any covenant term or other provision of this agreement or subsequent agreements are invalid, illegal, or incapable of being inforced by any rule of law or public policy, all other conditions and provisions of the agreement shall nevertheless remain in full force and effect and no covenant, term, or provision shall be deemed dependent on any other terms or provision unless so expressed herein.

37. INJUNCTIVE RELIEF: Nabcor shall be entitled to an Injunction refraining the BROKER for any breach of the terms and conditions of the RESTRICTIVE COVENANTS contained in this agreement and that any monies owing the BROKER by NABCOR under the terms of this or any subsequent agreement may be applied as liquidated damages. This provision or the restrictive covenants contained in this agreement may not be waived or modified by any subsequent agreements unless such waiver is specifically mentioned.

38. FILING OF CLAIMS: Any claim whatsoever against NABCOR or other representatives of NABCOR resulting from or arising out of this agreement or subsequent agreements that are not set forth in writing by registred mail within 30 days after termination of this agreement shall be considered waived. The restrictive covenants contained in paragraph 34 of this agreement shall be construed as independent of any other provisions here of and the existence of any claim in course of action of the BROKER against NABCOR whether predicated on this agreement or otherwise, shall not constitute a defense to the enforcement by NABCOR of said restrictive covenants. TO CHEVROLET MOTOR DIVISION PERSONNEL RECEIVING A COPY OF THE FINAL JUDGMENT IN UNITED STATES v. GENERAL MOTORS CORPORATION, ET AL. - CIVIL NO. 62-1208-CC (Los Angeles Discount House Case)

With this letter I am enclosing a copy of the Final Judgment that was entered by the District Court in the above-entitled case on August 18, 1966. A copy of said Judgment is being given to all employes of General Motors Corporation whose duties are such that they should be aware of the provisions of the Judgment.

You should read it carefully and make sure that you understand any provisions relating to activities in which you may be involved. If you have any questions or there are any provisions which you do not understand, take them up with your supervisor who in turn will facilitate their review by the General Counsel.

It is most important that all obligations of the Final Judgment be carried out. A finding by the Court of a violation of any of the basic provisions of the Judgment could result in the imposition of contempt penalties upon you as well as General Motors Corporation.

I am also enclosing herewith a copy of the letter being sent to all Chevrolet dealers today in connection with this Final Judgment. You should review it carefully.

Except as provided in Section IV A, the entry of the present Judgment and its provisions do not change the responsibilities imposed upon dealers and the Chevrolet Motor Division under our Selling Agreement. Nor does it affect our continuing conviction that the franchise system is indispensable to the marketing of automobiles, and, more importantly, is indispensable to providing owners with readily accessible and fully equipped dealerships essential to the safe maintenance and service of the millions of cars in our nation.

Should further developments warrant, you will be further advised. In the meantime, you are not to discuss with any dealership's principals, officers or employes or with any dealer associations, their members, officers or employes any activity of any Chevrolet dealer involving the sale of Chevrolet motor vehicles to or through discount houses, referral services or any other person or class of persons engaged in selling or offering automobiles for sale.

Please detach and return to your supervisor the acknowledgment set forth below.

Very truly yours,

L. H. Averill

time for such further orders and directions as may be necessary or appropriate for the construction or carrying out of this Final Judgment or for the modification or termination of any of the provisions thereof, and for the enforcement of compliance therewith and punishment of violations thereof.

Gentlemen:

On August 18, 1966, the United States District Court for the Southern District of California entered its Final Judgment in the so-called Los Angeles "discount house" anti-trust case. A copy of the District Court's Judgment is enclosed for your review.

As we previously informed you, the Supreme Court of the United States has expressly said that it was not deciding "questions concerning the meaning, effect, or validity of the 'location clause' or of any other provision in the Dealer Selling Agreement." Similarly, the Final Judgment expressly provides that it shall not be construed to adjudicate the effect or validity of any provision of a Chevrolet dealer franchise agreement and that it shall not be construed to enjoin General Motors from unilaterally enforcing any such agreement with one exception. This exception is the provision of Section IV A where, following a precedent in an earlier Supreme Court case involving another industry, the Judgment enjoins General Motors in the Southern California area for six (6) months from enforcing the Chevrolet Dealer Selling Agreement to prevent sales to or through discount houses and others.

In summary language, other provisions of the Judgment perpetually - -

> . . . enjoin General Motors on a nationwide basis from conspiring with any Chevrolet dealers or organization of Chevrolet dealers to restrict the sale of Chevrolet automobiles to or through any person offering such automobiles for sale, including discount houses.

DEFENDANT'S EXH. No. D

Rec'd in Evidence

> . . . enjoin General Motors and the defendant dealer associations from conspiring with each other or with Chevrolet dealers to investigate persons through whom any Chevrolet dealer in the Southern California area is selling Chevrolet automobiles.

> . . . enjoin the defendant dealer associations from investigating the persons through whom Southern California Chevrolet dealers sell automobiles, investigating selling prices in such transactions, or supplying to General Motors the results of any price investigation.

The above brief summary of certain provisions of the Judgment and any remarks concerning it should not be regarded as an official interpretation or explanation of the terms of the Final Judgment itself. Since the Judgment constitutes the present final judicial determination

of the case, reference must be made to it for definitive answers to any question concerning it and its effects. If you have any questions as to the application of this Judgment, we suggest that you review them with your attorney.

The Supreme Court opinion in this case (a copy of which was previously sent to you) suggests the legal consequences which may attach to any joint conduct or joint request by dealers or a dealer association that General Motors take action with respect to the conduct of any other dealer or dealers. It further suggests that actions which General Motors on its own is free to take with respect to a particular dealer under the Dealer Selling Agreement may be inhibited and serious legal hazards created if any other dealer or group of dealers intrudes into that individual relationship between General Motors and the dealer.

In the daily operation of Chevrolet Motor Division business relations with Chevrolet dealers, representatives of Chevrolet Motor Division will continue to sit down and talk to a dealer about the dealer's business as they have in the past. However, Chevrolet Motor Division personnel have been instructed not to discuss with any dealership's principals, officers or employes or with any dealer associations, their members, officers or employes, any activity of any other Chevrolet dealer involving the sale of Chevrolet motor vehicles to or through discount houses, referral services or any other person or class of persons engaged in selling or offering automobiles for sale.

DEFENDANT'S EXH. No. D

Rec'd in Evidence
Page 4

We solicit your cooperation in this matter and suggest that you likewise instruct your personnel to refrain from discussing with any Chevrolet Motor Division employes the activity of any Chevrolet dealer relating to sales to or through such discount houses, referral services or other persons.

The present Judgment is effective and binding on all parties thirty (30) days after entry, although it does not become final until the time for appeal has expired, namely sixty (60) days after entry. In the event of an appeal by the government or any further action by the Court, we will keep you informed.

Except as provided in Section IV A, the entry of the present Judgment and its provisions do not change the responsibilities imposed upon dealers and the Chevrolet Motor Division under our Selling Agreement. Nor does it affect our continuing conviction that the franchise system is indispensable to the marketing of automobiles, and, more importantly, is indispensable to providing owners with readily accessible and fully equipped dealerships essential to the safe maintenance and service of the millions of cars in our nation.

This letter is sent to you as a matter of information.

Very truly yours,

L. H. Averill

GENERAL MOTORS CORPORATION

Date: December 15, 1967

To: Mr. A. T. Olson

Subject: NABCOR, Inc.
101 Benson Manor
Jenkintown, Pennsylvania

I have this date contacted Mr. Frank Maiorana or NABCOR, Inc., 101 Benson Manor, Jenkintown, Pennsylvania. The contact was made in their local office in Room 508 General Motors Building, New York, New York. The only persons in attendance were Mr. Maiorana and myself.

Mr. Maiorana was advised that this contact was the result of his recent conversation with Mr. Edward P. Belcher, Staff Assistant in the Office of the Chairman of General Motors Corporation, and I then requested information relative to NABCOR and the operation of same.

Mr. Maiorana advised that NABCOR was comprised of approximately 200 distributors operating as licensees of NABCOR, Inc. A contract was executed with each distributor, and this contract stipulated that NABCOR would supply the distributor with new vehicles for a specific dollar amount which Mr. Maiorana did not disclose. NABCOR then contacted automobile dealers in the distributor's area and obtained written agreements to supply automobiles for a specific amount over the dealer's actual invoice.

Each distributor was now in a position to offer automobiles under a lease-purchase contract to interested parties in his area. These lease-purchase contracts are normally written for a three-year period, and at the expiration of the three-year term, the individual can acquire full title for the sum of $1.00, or he can return the vehicle to the NABCOR distributor.

Mr. Maiorana then advised that he was experiencing difficulties in some areas with GM dealers failing to honor their commitments under the terms of the agreement between NABCOR and the dealer. He further advised that he could document a case wherein a Chevrolet District Manager in the Buffalo Zone had advised a Chevrolet dealer not to sell Chevrolet automobiles to NABCOR, Inc. Mr. Maiorana stated that he wanted this situation to cease as it could "explode" into serious problems as a result of the court action in California involving Chevrolet Motor Division.

I explained to Mr. Maiorana that all GM personnel were aware of that court decision, and GM sold its products to GM dealers, and GM dealers as individual businessmen were free to set their own terms and conditions for the sale of these products.

Mr. Maiorana then requested information relative to the GM Fleet Users Certificate. He was advised that there were a number of requirements, and all companies must meet these requirements to be eligible for consideration. Among these requirements was the operation of a fleet of sufficient size to involve the purchase and registration of at least twenty (20) vehicles annually with the implicit understanding that such vehicles would be used for the specific purpose for which they were acquired--that is, leased by a leasing company, owned and operated by a commercial company, etc.

Mr. Maiorana wanted assurance that if NABCOR met these requirements they would receive a GM Fleet User Certificate. I advised Mr. Maiorana that I could not give him such an assurance as approval of requests was made by our Central Office in Detroit. He was advised that I would make his proposal known to our Central Office for their consideration.

SUBJECT Frank Maiorana
NABCOR, Inc. DATE January 3, 1968

Confirming our telephone conversation of this afternoon, Mr. Frank Maiorana visited this office again today. He reiterated his complaint that GM zone personnel were pressuring dealers who have tried to sell cars to NABCOR. He claimed some of the NABCOR distributors were contemplating legal action against GM and its dealers. He feels this could be avoided if NABCOR were given a GM Fleet User Certificate.

He expects to see Mr. Karney again tomorrow.

Date: December 20, 1967

To: Mr. R. L. Berg

Subject: NABCOR, INC.
Jenkintown, Pennsylvania

On December 13, 1967, the writer and Mr. D. Speece, Chevrolet Fleet Representative, contacted Mr. A. B. Maiorana of NABCOR, Inc. for the purpose of discussing this accounts eligibility for the General Motors Fleet User Certificate.

Mr. Maiorana explained that at the present time, his leased vehicles are registered in the names of the Lessees and not in the name of NABCOR, Inc. We advised Mr. Maiorana that in order for him to qualify for the Certificate the required quantity of twenty new vehicles per year would have to be registered in the name of NABCOR, Inc.

During the conversation, our "Purchase Allowance" program was mentioned. Mr. Maiorana stated that at this time he was not interested in rebate programs and that he was satisfied with the purchase prices he had arranged with G. M. dealers.

Mr. Maiorana claims that all vehicle records are maintained at their Yonkers, New York office.

We left Mr. Maiorana with the understanding that he will contact us as soon as he feels he has registered sufficient vehicles in the name of NABCOR, Inc. to qualify for the General Motors Fleet User Certificate.

A photostat copy of the lease agreement is attached.

Mr. A. T. Olson

MABCOR, INC.

A conference was held in the Fleet & Government Sales Section office, 426 General Motors Building, New York, New York, on January 4, 1968 beginning at 3:20 p.m. and ending at 5:00 p.m. This meeting was attended by Mr. Frank V. Maiorana, President, Mabcor, Inc.; Mr. D. M. Fogg, Fleet Representative, Chevrolet Motor Division, New York Zone and H. M. Kurney, Regional Director, Fleet & Government Sales Section, New York.

The conference was scheduled for 2:00 p.m. and Mr. Maiorana apologized for being one hour and twenty minutes late. I advised Mr. Maiorana that Mr. Fogg was present as a representative of Chevrolet Motor Division due to Mr. Maiorana's allegation in a conversation with me on December 15, 1967, that Chevrolet Motor Division personnel had interferred with Mabcor brokers in their purchase of Chevrolet passenger cars. I then asked Mr. Maiorana to supply the individual names of Chevrolet Motor Division personnel and Chevrolet dealers involved and specific dates and circumstances relative to his allegation. Mr. Maiorana declined to furnish any of the above information as he ".....did not want to get anyone in trouble." I assured Mr. Maiorana that General Motors did not intend to take punitive action against any employee, but the requested information was needed in order for Chevrolet Motor Division to correct the conditions included in his allegations. Again, Mr. Maiorana declined to provide any specific information and added the allegation that personnel of other General Motors Divisions were involved, and he did not want ".....to take the time to name names, dates and places today." He then advised that it would not be necessary to pursue these allegations if Mabcor, Inc., was granted a General Motors Fleet User Certificate.

At this time, information pertaining to Mabcor, Inc., was obtained from Mr. Maiorana for the purpose of completing form FS-95-C, Request for General Motors Fleet User Certificate, and this information is included in my letter to Mr. A. T. Olson, dated January 5, 1968, and the completed form FS-95-C attached to that letter. I advised Mr. Maiorana that his request for the General Motors Fleet User Certificate would be handled in the same manner as all other requests made by other companies, in that, it would be submitted to our Central Office for their customary review and advisement. Mr. Maiorana's only comment o this was that an early decision must be made, and he would like to have some information not later than January 10, 1968, as some of his brokers were pressing for legal action. Such an early decision would enable him to control the actions of any broker for Mabcor, Inc. I advised Mr. Maiorana that I did not have the responsibility nor the authority to make any decisions on his request, and under normal conditions, a decision on his request for the Certificate would take several weeks. He advised he would contact me on January 10,

1968 for information relative to the status of his request.

During the course of our conversation relative to the General Motors Fleet User Certificate, I asked Mr. Maiorana if he had had any contact with Mr. R. M. DiSimone of the Fleet & Government Sales Section in Philadelphia and he replied that he had not been in contact with Mr. DiSimone.

In concluding our conference, I again requested that Mr. Maiorana supply pertinent information relative to his initial allegation. He again declined and advised he would not supply any information until he had cleared it with his attorneys. At this point, he again indicated that a number of people were involved and included the allegation that Midtown Chevrolet-Pontiac Inc., New York, New York, had also refused to sell him automobiles. He advised that he had entered into an agreement with Don Allen Chevrolet to purchase vehicles, but when the operation changed to a Factory Branch, Midtown refused to sell them vehicles at any price. No comment was made to this allegation, but, for your information, Midtown Chevrolet-Pontiac. Inc., privileged matter deleted honored purchase orders placed for ten (10) Chevrolet passenger cars. Two of these vehicles were delivered to Mabcor, Inc. at the price included in the agreement between Mabcor, Inc. and Don Allen Midtown Chevrolet, and Midtown Chevrolet-Pontiac, Inc. has on file a letter from Mabcor, Inc. requesting cancellation of the eight (8) remaining Mabcor, Inc. purchase orders.

No additional comments were made and the conference concluded.

Very truly yours

Attached is a Request for Fleet Agreement forwarded by Nelson Karney.

Inasmuch as the president of the subject company, Mr. Frank Maiorana states that there are no company-owned vehicles, I do not see how we could authorize a Fleet Agreement in this case. Seems to me it is somewhat similar to the Lily-Tulip Company request which, you may recall, we have turned down within the past week on the basis that cars even though purchased by the company are registered in the names of the company employes who drive them.

Subject: NABCOR, INC.

Attached please find "Request for General Motors Fleet User Certificate" pertaining to Nabcor, Inc., Jenkintown, Pennsylvania. The request is submitted for your customary review and advisement.

Subject company has 140 brokers and five (5) distributors in various locations in the United States. Each broker and distributor is provided training and essential materials covering the leasing and sale of new passenger cars to individual customers. A fee is paid to Nabcor, Inc., for this training and essential materials. Financing of these vehicles is also available to the broker through Nabcor, Inc. The customer must provide his own insurance protection as this is not available through Nabcor, Inc.

Individual brokers solicit customers for automobiles on either a "Lease-Purchase Contract" or an outright sale basis. The Lease Purchase Contract is written for terms of 24, 30 or 36 months with equal monthly payments and upon expiration of this term the customer has the option to purchase the vehicle for the sum of one dollar ($1.00). The customer is required to make a Security Deposit and if the vehicle is notpurchased by the customer, this deposit is returned to the customer and the vehicle is disposed of by the broker with resultant funds shared by the broker and Nabcor, Inc. All vehicles are registered in the name of the individual customer.

An early reply to the attached request would be appreciated.

MEMORANDUM

A meeting was held in the Regional Fleet Section Office, 426-General Motors Building, New York, New York, at 1:30 p.m. on January 19, 1968. Attending this meeting were Mr. Frank Maiorana of Nabcor, Inc. and N. M. Karney of GM Fleet Section.

Mr. Maiorana wanted to know if the Request for Certificate had been approved or rejected and I advised him the request was still under advisement by our Central Office staff. He advised he wanted an answer by January 23, 1968 as he must give his Broker, who has asked for legal assistance, some information on or before January 23, 1968. I advised Mr. Maiorana I would contact Detroit and ask our office to provide a reply by the specified time. I again reviewed the process normal to the handling of a Certificate Request and indicated the D&B Report was handled by other than GM personnel and hence it could take some period of time to complete our normal investigation. I also advised his request was being handled just as a similar request from Lease Plan International or Peterson, Howell and Heather would be handled. Mr. Maiorana advised that if PH & H qualifies for our Certificate he feels Nabcor, Inc. would also qualify. I advised Mr. Maiorana that if PH & H only provided a management service and did not engage in leasing their qualification for the Certificate would be questionable. Such a management service would not comply with our terms, i.e., "......vehicles purchased and owned by the company and in which the company has the full investment during the normal period of service the vehicles are in company use."

FS
110C

Mr. Maiorana then attempted to debate the legal interpretation of the above definition and I advised him I did not have the legal background to engage in such a debate and the General Motors Legal Staff would be qualified to engage in such a debate.

I concluded the meeting by advising Mr. Maiorana that I would contact our Detroit Staff and inform them that he wanted a decision on his request by January 23, 1968. Mr. George Frink was immediately contacted by telephone and made aware of Mr. Maiorana's request.

Fleet User Certificate

for 1962

Certificate No. 4419 Issued November 1, 1962

TO: COMPANY: ALICREST AUTO LEASING, INC.

STREET ADDRESS: 1403 Ridge Pike

CITY AND STATE: Conshohocken, Pennsylvania

GENERAL MOTORS FLEET USER CERTIFICATE

It has always been the desire of General Motors Corporation and its Car and Truck Divisions to maintain a relationship with large Fleet Users, even though all of our motor vehicle products are sold and distributed by dealers.

The purpose of this Certificate, available to qualified Fleet Users who purchase annually a minimum of twenty new motor vehicles (cars and trucks, any and all makes) for use in their business, is to establish this relationship and offer the following services applicable to company-owned vehicles. These services apply to Chevrolet, Buick, Oldsmobile, Pontiac, Cadillac, Opel and Vauxhall passenger cars and to Chevrolet and GMC trucks.

1. *Identification*—To identify User, its branches, divisions and subsidiaries (if User is a State or political subdivision or instrumentality thereof, then such political entity together with its departments and bureaus) with General Motors Car and Truck Divisions, in order that various services may be rendered to User in connection with his purchase and use of General Motors vehicles throughout the United States.

The effectuation of this service will be accomplished by User furnishing Fleet Section—(a) detailed list of names and addresses of its branches, divisions and subsidiaries where motor vehicles are operated in User's business, and (b) a list of repair shops owned and operated by User, where such General Motors vehicles re serviced and repaired.

2. *Identification for Fleet Vehicles*—Upon receipt of a monthly report of deliveries of General Motors Vehicles on forms supplied by Fleet Section, stating the make, model, serial number, and engine number, if applicable, Fleet Section will furnish a Fleet User Identification Card for each company-owned General Motors make of vehicle listed on such report. Identification Cards may be renewed annually upon request covering all General Motors vehicles in User's company-owned fleet while User holds a Fleet User Certificate. During the life of such cards, authorized General Motors dealers customarily sell repair parts (as listed in the Parts Catalogs of the General Motors Car and Truck Divisions) to Fleet Users at prices similar to those accorded to wholesale customers.

3. *Identification of Fleet User Repair Shops*—Fleet Section will upon request, furnish a Fleet User Identification Card for each automotive repair shop operated by User to repair its company-owned vehicles of General Motors make, and will identify User with General Motors Car and Truck Divisions in order that such Divisions may, upon User's request, furnish User with Repair Manuals and Service Bulletins that may be available for the purpose of assisting User in the repair of ch General Motors vehicles.

4. *Product Information*—To furnish User with such product information and descriptive literature on General Motors vehicles as Fleet Section may deem of value to User in connection with the purchase and use of General Motors vehicles.

5. *General Motors Training Centers*—The facilities of General Motors Training Centers, located in and serving thirty major areas, are available for the purpose of training Fleet User's mechanics and shop personnel in the repair and maintenance of General Motors vehicles.

It is understood, in issuing this Certificate, that General Motors Corporation and its Car and Truck Divisions are not responsible for User's purchases which are made from authorized dealers in such vehicles, the specific purpose of the Certificate being to establish a relationship with the User, offer various services, and encourage User to purchase new motor vehicles of General Motors make from authorized dealers.

The certificate is not valid unless signed by the Director or Assistant Director of Fleet Section.

Dear Mr. Hamister:

In connection with your letter of July 29, 1968 it is my opinion that General Auto Sales & Leasing Company now does qualify under the Fleet Program. It is also my opinion that you can collect the $50.00 on the five units listed in your letter.

However, I would appreciate if possible an explanation of some nature as to why these applications will be over the normal sixty day period. This, of course, is necessary for me in order that I might write to our Flint Accounting location in an effort to obtain a wavier in this particular case.

Thank you.
